THE PRI

THE PRI’S MISSION

“We believe that an economically efficient, sustainable global financial system is a necessity for long-term value creation. Such a system will reward long-term, responsible investment and benefit the environment and society as a whole.

The PRI will work to achieve this sustainable global financial system by encouraging adoption of the Principles and collaboration on their implementation; by fostering good governance, integrity and accountability; and by addressing obstacles to a sustainable financial system that lie within market practices, structures and regulation.”

MESSAGE FROM THE CEO

Never before has the crucial role of responsible investment been more apparent, and as a result, the depth and breadth of engagement in ESG by investors continues apace. Responsible investment in many markets has moved firmly into the mainstream, with Bloomberg Intelligence estimating that ESG assets may surpass US$41 trillion in 2022.

Against this backdrop, and with PRI’s signatory base approaching 5,000, we look forward to engaging with you in the year ahead. As ever, we maintain an ongoing dialogue with you via multiple channels including our quarterly signatory update, annual report, blog, events and webinars.

At the outset of the PRI’s current strategy cycle, 2021-2024, the PRI Board committed to a signatory consultation on the PRI’s mission and purpose. This will be an opportunity to engage with signatories to create a shared vision for the role of the PRI going forward. At the same time, as the signatory base continues to grow and diversify, the time is right to review our offerings and the value that we deliver to signatories. We will undertake a series of activities, both online and in-person, to hear from signatories what they most value about being part of the PRI, and to enable us to refine, tailor and deliver on our value proposition. These conversations with signatories will be from September to November 2022.

Here in our 2022/23 work programme, you’ll find an overview of our work supporting you in the year ahead.

The work programme illustrates how we’ll deliver on our strategy in the year ahead. Given evolving dynamics, such as the war in Ukraine, we’ll also be flexible, adapting our resources to keep you informed of the implications of current events for responsible investing. Signatory discussions over the course of the year will also ensure that our work programme remains relevant to the issues signatories face as the year progresses.

The feedback we received from you over the past year has been invaluable and will ultimately shape the 2023 Reporting Framework, ensuring that it has a clear purpose and delivers signatory value.

Despite the ongoing challenges of the pandemic, responsible investment continues to gather momentum. We welcomed 1,148 new signatories in the past year, including 85 asset owners, bringing our signatory base to over 4,800. I am pleased to report that our global representation also continues to grow, with three of our four fastest growing regions in emerging markets.

Finally, reporting and assessment sits at the top of our agenda. The feedback we received from you over the past year has been invaluable and will ultimately shape the 2023 Reporting Framework, ensuring that it has a clear purpose and delivers signatory value. In June 2022, the 2021 public transparency reports and private assessment reports will be launched, alongside an updated assessment methodology. I want to thank you again for your continued patience and understanding throughout this process.

It’s an exciting year ahead, for responsible investment and for our signatories around the world. More than anything, I’m looking forward to working with you all.

SIGNATORY FEES

As a not-for-profit organisation, signatory fees and other revenue are all spent on delivering value to signatories. This year, the board has decided not to implement an inflationary increase for signatory fees, meaning fees will remain the same as 2021.

Fees are calculated based on signatories' AUM (for asset owners and investment managers) or number of investment staff (for service providers) as reported in the PRI’s 2021 Reporting and Assessment Framework.

The Principles for Responsible Investment (PRI)

The PRI works with its international network of signatories to put the six Principles for Responsible Investment into practice. Its goals are to understand the investment implications of environmental, social and governance (ESG) issues and to support signatories in integrating these issues into investment and ownership decisions. The PRI acts in the long-term interests of its signatories, of the financial markets and economies in which they operate and ultimately of the environment and society as a whole.

The six Principles for Responsible Investment are a voluntary and aspirational set of investment principles that offer a menu of possible actions for incorporating ESG issues into investment practice. The Principles were developed by investors, for investors. In implementing them, signatories contribute to developing a more sustainable global financial system.
