RI TRANSPARENCY REPORT

2014/15

Accident Compensation Corporation

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

ACC has an ethical investment policy that requires our investment activities to be conducted in an ethical manner that avoids prejudice to New Zealand's reputation as a responsible member of the world community.

We apply ethical principles that, in our judgement, are widely held by the New Zealand public. The spirit of New Zealand laws is used as a guide to reflect the ethical views of the New Zealand public, together with the values and principles set out in the United Nations (UN) Global Compact and UN Principles for Responsible Investment (UN PRI).

The ethical investment policy sets out the following framework.

- ACC engages with companies that have serious environmental, social or governance issues in order to modify corporate behaviour and improve performance in relation to ethical issues. This is undertaken directly with the companies or in collaboration with other Crown Financial Institutions, other investors or the UN PRI Engagement Clearinghouse.
- We don't invest in companies that undertake activities that are repugnant to the laws of New Zealand and exhibit corporate behaviour that seriously breaches ethical/responsible investment standards. This includes tobacco companies and those involved with the development and/or production of anti-personnel mines, cluster munitions and nuclear explosive devices.
- We encourage our fund managers to cast proxy votes in a manner that is consistent with the principles of good corporate governance and with the ethical investment policy.

- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Negative screens are linked to our Ethical Investing policy, and that policy is reviewed biannually.

- Positive/best-in-class screening
- Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

LEA 03.1	Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.
----------	---

☉ Yes

LEA 03.2

Describe how you identify and prioritise engagements.

We are in a RI resource sharing agreement with two other Crown Financial Institutions (CFIs) in NZ who are also UNPRI signatories. As a collective group we monitor our holdings using guidance from MSCI (a third party service provider), peer funds and general media, identifying companies that might breach - or have breached - recognised ESG standards. As a group, we collaborate on UNPRI's clearinghouse engagements, and direct engagement is undertaken on ACCs behalf when we consider such activity may be effective.

Every quarter, we assess the information to determine whether we should include a company in our engagement programme. The key factors we consider when prioritising our engagement efforts are whether the breach is of international standards or represents a high/significant risk using the following guidelines:

- Long-term or short term
- Historic or ongoing
- Isolated or endemic
- The degree of evident or likely public interest
- The potential for reputation risk internationally or nationally
- Our ability to participate in collaboration through the UNPRI clearinghouse led by others
- Our ability to engage directly with the company (size of holding, location)
- The potential effectiveness of engagement, and
- The resources required.

 - Yes, in the minority of cases

LEA 04.3

Describe how you monitor and evaluate the progress of your engagement activities.

As part of the resource sharing agreement and on company engagements, we carry out an annual evaluation process of our engagement activities. This evaluation checks projects against the key milestones and objectives we set for engagement. The company behavior and activities is also mapped with MSCI's ESG data/ratings to assess what changes have occurred within the company. A check point (discussion) on each individual engagement is also held at quarterly meetings, where company engagement is a recurring agenda item.

Yes

LEA 05.2

Describe how you identify and prioritise collaborative engagements.

As a CFI group, we have worked together and have agreed on priorities and processes in carrying out company engagements.

We prioritise collaborative engagements based on the following:

- those issues that were the most significant "focus" issues from portfolio monitoring and analysis.
- ESG issues that can have a material impact on the long-term value (including reputation) of the company.

From our experience, the following themes in this reporting year present the most significant issues on the portfolio:

- Human rights: labour conditions; operations in weak states
- Business ethics: bribery and corruption
- Severe environmental damage.
