RI TRANSPARENCY REPORT

2014/15

Alleron Investment Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

As an institutional fund manager Alleron Investment Management recognizes that we need to act in the long term interest of our clients. In this context, AIM believes that environmental, social, and corporate governance (ESG) issues can affect the performance of individual stocks within our investment portfolios (to varying degrees across companies, sectors, regions, and through time). Alleron therefore recognizes that the adherence to good management of ESG issues by the companies that Alleron invests in and by the broader universe of companies listed on the Australian market is a desirable outcome for Alleron's clients and for investors in the market as a whole. It is therefore appropriate that Alleron more specifically factor ESG issues into our investment processes. Alleron believes the United Nations Principles for Responsible Investment (UNPRI) forms a valid set of Principles on which to base our approach to responsible investment. Additionally, AIM also recognizes that applying the UN PRI may better align the interests of our client's with the broader objectives of a civil society. To this end Alleron has developed a Responsible Investment Policy that focuses on incorporating Responsible Investment and specifically the 6 principles of the UN PRI into our process and practices. The policy was first adopted in 2008 and is reviewed at least annually. It has been approved by the CEO and the Board of Directors. The key elements covered by the policy include Alleron's approach to:

- incorporation of ESG issues into investment analysis and decision making.
- incorporation of active ownership into our policies and practices.
- disclosure on ESG issues by the entities in which we invest.
- promotion of acceptance and implementation of the ESG within the Investment Industry.
- enhancing our effectiveness in ESG
- reporting ESG activities

OA 04.2 Describe your policy on managing potential conflicts of interest in the investment process. [Optional]

Alleron is an independent Investment Manager. Alleron's investment processes are designed to minimise the potential for conflicts of interest to occur. These include adherence to strict guidelines and procedures including Proxy Voting Policy and employee share trading procedures. Alleron's approach is to recognise circumstances and relationships that hold the potential for conflicts of interest and to proactively manage these by disclosing, controlling or avoiding the conflict of interest. Where appropriate all conflicts should be controlled or avoided. Alleron's Risk and Compliance Committee identifies and documents all material conflicts of interest in a Register of Conflicts of Interest. This register also records the steps taken to manage or disclose all such conflicts.

Alleron is an active bottom up manager and assesses each company using bottom up analysis and as part of this analysis Alleron is aware of screening or thematic investment issues but we incorporate these into bottom up analysis and therefore do not use them from a top down sense.

Allerons investment process is highly suited to integration of ESG issues into our qualitative assessment of companies.

Alleron believes that ESG issues may provide opportunities for investment that are best identified via integration.

LEA 03.2

Describe how you identify and prioritise engagements.

Alleron's engagement requirements are identified during the investment analysis process and discussed within the investment team. Issues considered include environmental, social and governance issues but are raised on a stock specific basis. Engagements are undertaken by the investment team.

When meeting with company management or board the investment team will, prior to the meeting, assess what general ESG discussion is relevant as well as whether any specific ESG issues require discussion.

Where a specific ESG issue is identified as part of the investment analysis process, the responsible analyst will proactively engage with the company to address the issue.

All ESG engagements are recorded with the details and outcomes noted.
