RI TRANSPARENCY REPORT

2014/15

Amalgamated Bank

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 10.3

Additional information. [Optional]

All of our domestic listed equity investment activities are broad index funds, most of which are pure index replication models. At their core, the funds aim to present trustees with an option to achieve their fiduciary duties by replicating market returns through low-fee, broadly diversified portfolios. Instead of active stock picking, the index funds opt to engage with companies that are underperforming or where shareholder value may be at risk by encouraging strong governance practices. The LongView Funds recognize that over 90% of employee benefit funds in the U.S. have passive index strategies as part of their asset allocation, with an explicit aim to preserve capital by replicating market returns through passive strategies. Our "active ownership" model offers basic index strategies but with a built-in aim to exercise active ownership through engagement and monitoring.

We explicitly retain all trustee powers of subadvised index funds in order to actively exercise ownership, including collaborative engagements, proxy voting, shareholder resolutions, and litigation strategies. Subadvisors must agree to this. We therefore do not assess subadvisor's responsible investment practices on the funds since we control all aspects of the responsible ownership activities of the funds.

We monitor company commitments to ensure promised reforms are implemented. And we continuously monitor the companies in our portfolio for risks to shareholder value and long-term performance.

Through these organizations and others, the LongView Funds identify potential topics for joint investor engagements addressing investor rights, pay-for-performance compensation engagements, board accountability enhancements, and sustainability initiatives.

(Proxy) voting and shareholder resolutions

Overview

LEA 16	Voluntary	Descriptive	PRI 2
---------------	------------------	--------------------	--------------

LEA 16.1	Provide a brief overview of your organisation’s approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).
-----------------	--

Amalgamated Bank's LongView Funds have developed proxy voting guidelines. We vote each and every proxy in our portfolio, in every market. The guidelines maintain very rigorous standards for environmental, social, and governance issues that we believe will promote long-term shareholder value creation. Based on continuous monitoring of individual company performance in our portfolios as well as scrutinizing practices that we believe may place shareholder value at risk, we engage numerous companies every year (and have since the inception of the LongView Funds in 1992) by letter writing, shareholder meeting attendance, meetings and dialogues with companies, and shareholder resolutions. We are internally staffed to manage and navigate shareholder resolution filings and often our resolutions become templates for other institutional investors to use when engaging their portfolios on similar issues.
