RI TRANSPARENCY REPORT

2014/15

Appian Holdings

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Appian Holdings Limited ("Appian") is the manager to the Appian Natural Resources Fund (the "Fund"), a leading private equity vehicle which invests in metal and mining companies, assets and management teams across selected geographies and commodities.

Utilising an innovative investment model, Appian combines a best in class private equity approach with a collaborative investment style that ensures that portfolio companies and all stakeholders benefit from Appian's involvement.

Appian is a signatory of the UN-backed Principles for Responsible Investment and incorporates the six Principles into its investment due diligence approach for any potential investment.

Appian is committed to incorporating environmental, social and governance standards across the whole investment lifecycle, from the initial desktop due diligence, site visits, through to ongoing operational portfolio management and ultimate exit of that investment.

During investment due diligence, Appian will review all ESG issues that are relevant to that particular target investment.

If environmental, social or governance issues are identified during the due diligence phase that do not have appropriate / achievable risk management procedures in place in order to satisfactorily address and improve these matters, that acquisition would not proceed to completion as Appian would decline the investment.

Appian believes that adhering to the highest environmental, social and governance standards benefits all stakeholders in the private equity domain; investors, portfolio company shareholders, management and employees, together with the local community to that portfolio company.

The Investment Advisor to the Fund, Appian Capital Advisory LLP ("ACAL"), is authorised and regulated by the Financial Conduct Authority. As such, when sourcing investment opportunities for Appian, the Investment Advisor must adhere to the following ethical standards:

1. All conflicts of interest must be managed appropriately
2. All staff should be sensitive to the potential and actual conflicts of interest in the areas they work
3. Any conflicts of interest must be disclosed to the Compliance Officer, who maintains a register of conflicts and how they have been appropriately managed
4. It is unacceptable to ignore conflicts of interest

All staff receive induction and annual refresher training on conflict of interest issues and management, and are required to sign confirmations that they have received the training, together with their adherence to all standards of the Compliance Manuals which cover the rules and behaviour for the following topics:

1. Conflicts of interest
2. Confidentiality
3. Insider trading
4. Personal account dealing rules
5. Gifts
6. Anti-money laundering
7. Anti-corruption

In addition, the Fund governing documents also set out the procedures for managing potential conflicts of interest.

PE 04.2 Describe how your organisation's investment guidelines outline your expectations on staff and portfolio companies' approach towards ESG issues [Optional].

Appian's Investment Guidelines, as codified in the Fund's Limited Partnership Agreement and with reference to its Private Placement Memorandum, are clear in that they specifically state that Appian will adhere to the six Principles of ESG of the UN-backed Principles for Responsible Investment, both in the investment decision making process and portfolio company management. Consequently, due diligence on a potential portfolio company will include analysis of the ESG risks, and the mitigating factors in relation to these risks, for example, the portfolio company's planned response to address the potential ESG matters.

Appian is a signatory of the UN-backed Principles for Responsible Investment and incorporates the six Principles into its investment due diligence approach for any potential investment.

Appian is committed to incorporating environmental, social and governance standards across the whole investment lifecycle, from the initial desktop due diligence, site visits, through to ongoing operational portfolio management and ultimate exit of that investment.

During investment due diligence, Appian will review all ESG issues that are relevant to that particular target investment.

If environmental, social or governance issues are identified during the due diligence phase that do not have appropriate / achievable risk management procedures in place in order to satisfactorily address and improve these matters, that acquisition would not proceed to completion as Appian would decline the investment.

Appian believes that adhering to the highest environmental, social and governance standards benefits all stakeholders in the private equity domain; investors, portfolio company shareholders, management and employees, together with the local community to that portfolio company.

A significant part of Appian's due diligence process in relation to a potential portfolio company will focus on ESG issues relevant to that particular company, including in relation to its geographical location and local community. No two investments are the same, therefore the ESG matters to perform due diligence on will differ from target company to target company. If there are any ESG issues that the company is not / will not address then Appian would not continue with the due diligence and would decline to invest.

All investments are ultimately and unanimously approved by Appian's Investment Committee.

ESG issues that could be relevant to any particular investment include:

- Impact on local community of mine development
- Impact on local environment (local water supply, general environment for example) of mine development
- Governmental stability
- Potential for resource nationalism
- Health and safety
- Labour relations
