RI TRANSPARENCY REPORT

2014/15

Ardea Investment Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

ESG issues are incorporated into our investment decisions with respect to "fixed income - government" at the portfolio level e.g. the decision to be long duration or short volatility generally must consider ESG issues. This macro positioning, is expressed through government fixed income securities and their derivatives, but it is not a stock selection decision in itself.

- Yes
 No

OA 01.2 Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
 No

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Ardea's ESG process and policy is intergrated into our decision making. It is a part of our overall investment framework and its relevance can vary from case to case. As our investment framework is qualitative (but supported by quantitative tools), relevance is largely judgement based. Our ESG Policy outlines the scope of our policy and then details our process for identification, assessment, intergation and engagement. Generally ESG is not applied to high quality government securities from a stock selection perspective, but is applied to other "credit" stock selection decisions (which are less than 10% of AUM). We do not use screens or filters but rather attempt to weight ESG issues in our overall valuation. At a portfolio level e.g. the decision to go overweight inflation, macro positions are also influenced by ESG factors. Accordingly, an ESG process also is implemented.

OA 02.1 Indicate if your responsible investment policy is publicly available.

OA 03.2	Comment on any variations or exceptions in the coverage of your responsible investment policy. [Optional]
----------------	---

In terms of stock selection, ESG coverage does not apply to high quality government and supranational exposures, nor does it apply to corporate securities of less than 6 months maturity and collateralised derivative positions. We consider ESG is more pertinent to our macro views e.g. real interest rates, inflation and so we also integrate ESG considerations into the macro positions e.g. duration, break even inflation in the portfolio.

OA 04	Mandatory	Core Assessed	General
--------------	------------------	----------------------	----------------

OA 04.1	Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.
----------------	---

Yes

OA 04.2	Describe your policy on managing potential conflicts of interest in the investment process. [Optional]
----------------	--

Ardea manages its conflicts in accordance with a four-step conflicts management process that involves: 1. Identifying conflict situations including utilising a conflicts register. 2. Assessing the likelihood of the conflict compromising the quality of the financial services provided by Ardea. 3. Appropriately responding to the conflict situation. Once the impact of a conflict situation has been assessed, an appropriate response must be developed and implemented. An appropriate response will depend on the facts and circumstances surrounding the conflict situation. 4. Adequate disclosure of the conflict and Ardea's response to it.
