RI TRANSPARENCY REPORT

2014/15

Astorg Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Astorg does not have a formal mechanism to review ESG-related risk.

Astorg's due diligence is broad and thorough, and includes most all ESG related factors.

As part of careful investing practices, Astorg focuses the usual due diligence on material issues that cover most of ESG aspects.

In particular, Astorg :

- systematically reviews the dependency of business models to energy;
- systematically questions the environmental impacts of production processes in industrial companies;
- systematically addresses the question of fair employment rules in the organizations of contemplated companies as part of the "Legal" due diligence;
- formally excludes any investment opportunity in sectors that may contravene French laws.

As examples, Astorg conducted:

- Environmental due diligence reviews during the acquisition process of Etypharm (specialty pharma) and Metalor (precious metal refinements)
- A social risks assessment during the acquisition process of Trescal.

Astorg's companies present formal monthly reporting. This format allows Astorg to discuss risk and opportunities presented by management or otherwise. Astorg has influence over risk identification and pursuant actions.

Astorg takes control stakes in its companies, which allow Astorg to have Board representation and substantial influence over management.

Astorg encourages management meetings and internal analysis, shared by the companies' executives and requests the most accurate level of financial and operational reporting (Astorg helps design this reporting if not pre-existing). Astorg maintains constant dialogue with its CEOs.

Hence, Astorg is aware of all risks facing the portfolio, including ESG.

Compliance with social and environmental laws and regulations are tested during our due diligence process.

We can safely assume that this compliance is then followed and reported on during our monitoring assignments, because we aim at implementing the highest level of transparency with our investee companies, and all aspects of business continuity are addressed during our monthly work sessions with management teams. Compliance with applying laws and regulations is a common discussion area to be addressed.
