RI TRANSPARENCY REPORT

2014/15

AustralianSuper

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

As a long-term investor, AustralianSuper is aware that environmental, social and governance (ESG) issues may affect its investments. As trustees, AustralianSuper is required to assess and manage all foreseeable risk factors effectively. AustralianSuper considers ESG as an investment-related risk.

AustralianSuper's broad approach to managing ESG risk has been to establish an Active Ownership Program which aims to maximise long term value for members. The program aims to cover functions such as:

- Exercising AustralianSuper's rights and responsibilities as an active owner (such as share voting)
- Ensuring appropriate consideration and integration of ESG issues in the investment portfolio.

Several policies sit within this program such as share voting, class action and engagement policies.

Investment consultants have been part of AustralianSuper since its inception however, their role has changed over time as business operations have changed. In addition the role of managers within the organisation is also changing, for example in property we are no longer investing in funds therefore there are non new manager selections or appointments. We don't use consultants for monitoring existing funds in property.

LEA 02.2

Additional information. [Optional]

Our major service provider is ACSI.

ACSI's member funds are united by the beliefs that:

- The short-term outlook of many actors in the investment system means that today's market prices may not capture all of the risks and opportunities inherent in the value of companies.
- Responsible exercise of ownership rights by long-term asset owners can assist in improving that value and consequent investment return outcomes for their members.
- The financial system is not always set up in the best long term interests of beneficiaries.

ACSI's mission is, therefore, to enhance sustainable long term value for the retirement savings that are entrusted to our Members as fiduciary institutional investors. ACSI achieves this by representing the collective rights and interests of Members through influencing companies, investors, government and opinion leaders.

LEA 03	Mandatory	Core Assessed	PRI 2
--------	-----------	---------------	-------

LEA 03.1 Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.

Yes

LEA 03.2 Describe how you identify and prioritise engagements.

As mentioned previously, AustralianSuper's engagement with companies is structured around three main types:

1. Ongoing relationship building: The main aim is to ensure Companies recognise AustralianSuper as the beneficial owner of the company. The topics of discussion with the companies revolved around business strategy, remuneration and governance issues (such as diversity, board succession planning and structure). In addition, other topics such as carbon, employees, bribery and corruption may also be discussed where risks were identified.

2. Themes based engagement: Themes are identified and engagement plan is developed e.g. labour supply chain management which was a priority issue for 2014.

3. Ad hoc specific issues engagement: We seek to engage of relevant topics for example regarding specific resolutions

These engagement priorities especially themes based engagement are set and reviewed for the Governance team at the beginning of the year by the Investment Committee and reviewed half way through the year by the same Committee.

For themes based engagement the criteria for target companies tends to be around the materiality of the theme for the company for example labour supply chain management would target retail companies.

LEA 07.3

Additional information. [Optional]

For our engagement in relation to ACSI, ACSI annually creates a list of engagement priority companies with specifically defined concerns and objectives for each company. Objectives are meaningful changes in company behavior. ACSI also sets objectives for the proportion of all priority companies where objectives are met (for example, ACSI may aim for over 50% of all priority companies' objectives to be met).

Monitoring and evaluation is done through semiannual progress reports, itemized company by company and in aggregate, which are delivered to member funds.

Inbound engagements with companies that are not on the priority list also involve specific objectives, though typically less material. Monitoring of these is done through annual evaluation by ACSI's Member Council, and a range of internal reports. The results of these engagement meetings are also included in ACSI's proxy voting reports and surveys involving all companies in ACSI's universe (called "longitudinal" research projects).

Process

LEA 17	Mandatory	Descriptive	PRI 2
---------------	------------------	--------------------	--------------

LEA 17.1	Indicate how you typically make your (proxy) voting decisions and what this approach is based on.
-----------------	---------------------------------------------------------------------------------------------------

	Approach
--	----------

- We use our own research or voting team and make our own voting decisions without the use of service providers.
- We hire service provider(s) which make voting recommendations or provide research that we use to inform our voting decisions.

	Based primarily on
--	--------------------

- the service provider voting policy signed off by us
- our own voting policy
- our clients requests or policy
- other, explain
- We hire service provider(s) which make voting decisions on our behalf, except for some pre-defined scenarios for which we review and make voting decisions.
- We hire service provider(s) which make voting decisions on our behalf.

LEA 17.2	Additional information.[Optional]
-----------------	-----------------------------------

We use a combination of option one and two as they are not mutually exclusive. We have our own voting policy that we ultimately base our voting on. However, we engage a service provider knowing where their policy diverges from ours. Hence we use a combination of the two to reach our final decision.

LEA 21	Mandatory	Core Assessed	PRI 2
---------------	------------------	----------------------	--------------

LEA 21.1	Indicate if you ensure that companies are informed of the rationale when you and/or the service providers acting on your behalf abstain or vote against management recommendations.
-----------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- Yes, in most cases
- Sometimes, in the following cases:
- No
- Not applicable as we and/or our service providers do not abstain or vote against management recommendations

LEA 21.2	Additional information. [Optional]
-----------------	------------------------------------

For all companies covered by our external provider ACSI's voting service, ACSI corresponds either via meeting or teleconference around the time of the company meeting, or writes to each company where there was an 'against' recommendation expressing its rationale and concerns. Companies where there are more material concerns become Corporate Governance engagement priorities where ACSI typically holds face to face meetings with the company urging it to change its practices. ACSI does not vote on behalf of its members.

Broadly, as part of the due diligence phase AustralianSuper will engage environmental and building consultants. These consultants prepare reports on issues such as the compliance with regulations and certifications, presence of asbestos and health and safety plans. AustralianSuper surveys this material to understand the materiality of specific ESG risks. In addition for ESG issues identified, such as climate change, the internal ESG team may provide reports detailing the extent of that risk for any particular asset.

Where applicable we would (and have) assessed community engagement issues particularly around planned expansions and consequent consultations with communities.
