RI TRANSPARENCY REPORT

2014/15

Carmignac Gestion

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

In June 2012, Carmignac Gestion has made a public commitment to adopt and apply the United Nations Principles for Responsible Investment (UNPRI). We have gradually introduced environmental, social and governance (ESG) factors more formally in our investment analysis and decision-making process. To do so, we have partnered with the consultancy firm MSCI ESG research for three separate services: a Business involvement screen tool, annual ESG portfolio analytics, and the possibility to request ESG specific research on an ad hoc basis.

OA 04.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

OA 04.2

Describe your policy on managing potential conflicts of interest in the investment process.
[Optional]

Regarding potential conflicts of interest, it is worth mentioning that Carmignac Gestion's equity capital is held by the founder and the employees. In addition, the company does not engage in any brokerage or research activities for outside companies. Both elements are aimed at reducing potential situations of conflict of interest.

However, Carmignac Gestion has established a mapping of theoretic situations that could be viewed as a conflict of interest. The measures taken consist in anticipating potential risks that a conflict of interest may occur via specific written internal procedures.

These procedures, included in the internal code of conduct of the company, aim to prevent, detect, and managed fairly the conflict of interest that might appear between the company's own interests and those of its clients or between the interests of different clients.

In this context, Carmignac Gestion will identify and control:

- The participation of team members in one or more investment services offered by the company
- The split between activities likely to generate potential conflicts (e.g.: activities for own accounts and for third parties)
- The diffusion of confidential or sensitive information within the company
- The social mandates exercised by staff members in their private life or within the framework of their professional activities.
- The commissions paid or received under services or activities exerted by or in favour of the company
- The remuneration scheme of staff members within the framework of the distribution of the financial results of the company
- The advantages or gifts possibly received by staff members within the framework of their professional activities.

Although Carmignac Gestion does not manage specialized SRI funds, the investment management team does incorporate a certain number of ESG filters, policies and reporting in the overall investment process. Carmignac Gestion has engaged a specialized ESG consultant MSCI ESG Research to offer the capacity for pre-screening of companies for ESG controversies even prior to our analysts and Portfolio Managers company research meetings. (This service also includes an annual ESG analytical assessment of most of our funds). Other than the MSCI ESG tools and analytics, the portfolio managers and analysts complete a checklist for each investment case which includes fields for comment on E, S and G issues if they are relevant. Best-in-class approach is part of the process of stock selection which can include a possible exclusion should the company contravene what we see as responsible policies regarding the environment, their governance or social issues for employees or clients. Carmignac Gestion respects a list of exclusions (companies involved in controversial weapons as anti-personnel mines and cluster bombs). We also have an internal management system that prevents investments in certain countries such as Iran. Should a controversy arise the analysts and Portfolio Managers engage directly with companies to determine, either, a resolution to the controversy or an exit from the investment. Some examples of this can be found in our Fund annual reports that respect the ESG criteria in their investment process, where a mandatory comment is made on ESG issues that the fund may have experienced, as well as a qualitative comment on the evolution of the funds' MSCI ESG analytical assessment. Carmignac Gestion operates a voting policy, the full details can be found along with all aspects of our ESG policy on our internet site.

We apply an exclusion policy for which the sectors, companies and countries are pre-set into our Bloomberg AIM portfolio management system. Description

Although Carmignac Gestion does not manage specialized SRI funds, the investment management team does incorporate a certain number of ESG filters, policies and reporting in the overall investment process. Carmignac Gestion has engaged a specialized ESG consultant MSCI ESG Research to offer the capacity for pre-screening of companies for ESG controversies even prior to our analysts and Portfolio Managers company research meetings. (This service also includes an annual ESG analytical assessment of most of our funds). Other than the MCSI ESG tools and analytics, the portfolio managers and analysts complete a checklist for each investment case which includes fields for comment on E, S and G issues if they are relevant. Best-in-class approach is part of the process of stock selection which can include a possible exclusion should the company contravene what we see as responsible policies regarding the environment, their governance or social issues for employees or clients. Carmignac Gestion respects a list of exclusions (companies involved in controversial weapons as anti-personnel mines and cluster bombs). We also have an internal management system that prevents investments in certain countries such as Iran. Should a controversy arise the analysts and Portfolio Managers engage directly with companies to determine, either, a resolution to the controversy or an exit from the investment. Some examples of this can be found in our Fund annual reports that respect the ESG criteria in their investment process, where a mandatory comment is made on ESG issues that the fund may have experienced, as well as a qualitative comment on the evolution of the funds' MSCI ESG analytical assessment. Carmignac Gestion operates a voting policy, the full details can be found along with all aspects of our ESG policy on our internet site.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------	---

Excluded companies, sectors, and countries are predefined in our order management system to prevent transactions which compose part of our filtering process.

Analysts and portfolio managers will screen companies for controversies within ESG criteria among other financial criteria.

The analysts and portfolio managers may use the MSCI ESG Business tool to screen for controversies within a sector or a country.
