RI TRANSPARENCY REPORT

2014/15

Celeste Funds Management Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.1 Indicate if you have a responsible investment policy.

- Yes
 No

OA 01.2 Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
 No

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Celeste believes that environmental, social and corporate governance (ESG) issues impact on investment valuations and can affect the performance of portfolios. Managed poorly, ESG practices have the potential to destroy shareholder value. As an active investment manager we consider the potential financial impacts of companies' exposure to, and management of these issues.

We have a 'Responsible Investment Policy' which is part of our 'Responsible Investment Framework Document'. This outlines our approach to ESG integration in our investment process and is available on our website at <http://celestefunds.com.au/responsibleinvestment.aspx>.

Celeste has fully integrated ESG analysis into our investment process and stock valuations. We do not outsource its ESG analysis to third parties.

The assessment of ESG issues is divided into a three step process. The analyst first identifies the materiality of E, S and G issues based on clearly defined criteria, and then rates the company's performance against these criteria. Depending on the materiality and performance score, this then impacts on the valuation of the stock.

It is important to understand that we do not negatively screen out prospective investee companies based on ESG considerations. We can theoretically invest in companies that in a broader sense could be described as ESG unfriendly, for example, significant carbon emitters, companies that have less than exemplary governance standards, or companies that provide services or manufacture products that might be considered to be harmful to society, such as gambling and alcohol.

Instead, because we are driven by the pursuit of ALPHA, our ESG assessments are applied in determining the sustainability of businesses and the returns to shareholders that they are able to generate.

We seek to engage with investee and prospective investee companies in helping to improve their ESG performance, where we believe this to potentially have a material impact on shareholder value. We record our engagement effort on ESG matters in File Notes and our "Engagement and Proxy Voting Register". An analyst's ESG assessment also forms an integral part of our Stock Review document which is subject to peer review and discussion.

However, it needs stressing that our principle focus in evaluating ESG issues relates to the impact they are likely to have on the value of our investments. As such, we seek to develop a clear understanding of the materiality of various ESG factors.

Our approach to ESG is therefore no different to our approach to any other parameters that impact, or have potential to impact the value of our investments.

LEI 03.2	Describe your primary reasons for choosing a particular ESG incorporation strategy.
----------	---

We feel that a thematic focus or screening process might simplify the incorporation of ESG strategy into the investment process, but neither are in the clients' best interest.

Applying such 'broad brush' approaches might lead to ALPHA destruction both by investment opportunities being missed as they are 'screened out' or complacency in identifying other ESG risk factors that are not taken care of by the screening process.

We feel that only full integration into the investment process and bottom-up analysis on a case by case basis fosters real analyst sensitivity to ESG issues and allows them to continuously increase their 'ESG competency'.

Process

Process for engagements run internally

LEA 03	Mandatory	Core Assessed	PRI 2
--------	-----------	---------------	-------

LEA 03.1	Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.
----------	---

☉ Yes

LEA 03.2

Describe how you identify and prioritise engagements.

At a minimum, our "Engagement and Proxy Voting" policy compels us to engage with a company on any issues where we intend to vote AGAINST a resolution at a shareholder meeting. The agenda and timelines for this type of engagement are effectively set by the "Notice of Meeting" and voting deadlines set out therein.

In addition, through regular company contact, we engage on an informal basis with companies on certain ESG issues. Prioritization of the engagement is determined by the nature of the issue at hand and its potential impact on valuation.
