# RI TRANSPARENCY REPORT

## 2014/15

Commonfund

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

## Overview

<b>SAM 01</b>	<b>Voluntary</b>	<b>Descriptive</b>	<b>PRI 1-6</b>
---------------	------------------	--------------------	----------------

**SAM 01.1** Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

Commonfund takes a three-tiered approach to ESG Integration:

**Monitor (Manager Due Diligence):** ESG considerations are reviewed alongside more traditional indicators such as team, strategy, performance and terms of investment. As part of Commonfund's due diligence process we ask potential managers a series of questions about whether and how they integrate analysis of financially material ESG factors into their investment process. These questions are included in Commonfund's Due Diligence Questionnaire, which managers complete prior to initial hire and then update annually or in private capital programs, when a re-investment decision is being made. We also ask about these issues during on-site visits to our managers and regular calls throughout the year.

**Measure:** We have conducted periodic and targeted reviews of our portfolios to assess their exposure to ESG factors and are in the process of refining our approach to this aggregate portfolio analysis. Where relevant, Commonfund may use research provided by third-party research specialists to analyze the risks and opportunities that ESG factors may pose for our commingled portfolios and separately managed accounts.

**Manage:** In addition to the manager due diligence process described above, once a manager has been approved for investment, Commonfund may endeavor to negotiate provisions with the manager addressing whether and how ESG factors will be reflected in the construction of the portfolio; reporting on the impact of ESG factors within the portfolio; proxy voting; and any targets relating to ESG integration.

#### SAM 10.2

Provide additional information relevant to your organisation's selection approach for non-listed assets. [Optional]

As part of our assessment of how a manager approaches ESG, there are multiple evaluation points during the due diligence process. We assess approaches to ESG through our standardized Risk Management Questionnaire and thereafter in face-to-face discussion with key decision makers within management. While we have non-listed assets across many geographies (global scope) and our three core strategies (Private Equity, Venture Capital, and Natural Resources), we take a similar standardized approach in each instance. Our evaluation of each instance will differ as it is appropriate for that instance's particular geography or strategic focus. For example, within Natural Resources, we might take a more holistic approach to Environmental issues by looking at what is historically used in the sector - Health/Safety/Environment (HSE).

While we evaluate ESG related metrics, we may still opt to pursue a manager if they do not meet all maximum criteria. We view ESG implementation and awareness on a spectrum and assess in each situation whether or not the manager is at an appropriate place on that spectrum relative to their focus, tenure, and size. It is also important to note, we place great value on intent by the manager and evaluate this such metric qualitatively.
