RI TRANSPARENCY REPORT

2014/15

CNP Assurances

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Additional information. [Optional]

CNP Assurances has chosen to provide to PRI reporting in "internally managed" classes the securities held directly whose management is delegated to external assets management. This choice stems from the fact that strategy SRI is defined by CNP Assurances. It delegates the application and SRI research to its asset managers but remains driver. The list of eligible listed equity is defined by CNP and asset managers assets. The list of eligible fixed income is defined by CNP.

Property	With €6 billion in property assets in France based on net book values, CNP Assurances is an important player in this market. Management of its property assets is entrusted to specialised companies on the basis of strict specifications that deal notably with the need to preserve the environment and ensure the safety of the properties' tenants and users as well as that of construction workers. These include the Sustainable Property Management Charter adopted with Icade in 2008 and the "green appendices" added to property management master agreements and club deal agreements since 2012.

Asset Class	Describe what processes are in place and the outputs or outcomes achieved
Private equity	Since 2010, ESG ratings are awarded based on the due diligence process carried out ahead of any new private equity investment. A total of 18 private equity funds were rated in 2013. In addition, CNP Assurances invested in several socially responsible funds that finance small businesses experiencing social barriers to raising equity capital and support struggling SMEs. Together, these thirteen funds represent total commitments of nearly €123 million, or 4.8% of investment lines and nearly 2.8% of total commitments at year-end 2013.
Infrastructure	Since 2010, an ESG questionnaire has been introduced for all new infrastructure investments and regular reports are requested. Investments in renewable energies and water and waste treatment represented total assets of €133 million at 31 December 2013.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Our core business is life insurance. To provide an annual return to our policyholders, financial management is benchmarked. The Best-in-class approach is the one that best meets this constraint.

(A) Implementation: Screening

LEI 06	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Since 2008, CNP Assurances has excluded manufacturers of cluster munitions and anti-personnel mines.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Equities have been monitored on a quarterly basis since 2006 with ESG analysts at Natixis AM and since 2009 at LBPAM. Constructive dialogue is engaged with investee companies whenever a problem is revealed during the quarterly screening process via our asset managers or during the lead-up to General Meetings. This process is repeated year after year, given the long investment horizons.

When dialogue fails to produce results, other increasingly severe measures may be taken, from not making any follow-up investments to selling the entire stake.

- Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

The screening is established with the rating for each company conducted by the SRI team of our asset managers. This rating is submitted quarterly by each asset manager. It explains the evolution of the new analysis and compared with the financial and SRI benchmark. We do not disclose the details of this screening to our policyholders.

LEI 07	Mandatory	Core Assessed	PRI 1
---------------	------------------	----------------------	--------------

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
 - The analysis is done by 2 different ESG research team (one for each of our asset managers) and they also use extra-financial agency ratings.
- None of the above

LEI 07.2	Additional information. [Optional]
-----------------	------------------------------------

The ESG research team is present to the quarterly committee and explain its analysis.

(C) Implementation: Integration of ESG issues

LEI 11	Mandatory	Core Assessed	PRI 1

Votes cast (to the nearest 1%)

%

77

Specify the basis on which this percentage is calculated

- of the total number of ballot items on which you could have issued instructions
- of the total number of company meetings at which you could have voted
- of the total value of your listed equity holdings on which you could have voted

LEA 22.2 If there are specific reasons why you did not vote certain holdings, explain these, and if possible, indicate the percentage of holdings affected by these factors. [Optional]

Since 2005, CNP Assurances has been committed, both on its own behalf, to taking an active role in voting at the General Meetings of listed companies in its portfolio. It does not leave it to the asset management companies to vote on its behalf, except with regard to its holdings in mutual funds. CNP Assurances voted at almost all the General Meetings the French companies in its portfolio and some 20 European issuers.

We do not track or collect this information

LEA 22.3 Additional information. [Optional]

In 2014, CNP Assurances voted at the general meetings of companies representing 99.9% of the portfolio of French equities.
