RI TRANSPARENCY REPORT

2014/15

Daiwa Asset Management Co. Ltd

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We believe it is our responsibility to contribute in achieving a sustainable society through our core asset management business.

As a signatory of the Principles for Responsible Investment (PRI), we have been making a number of efforts aimed at integrating ESG (environmental, social and governance) issues into our investment decision-making, as well as promote to propagate the practice of responsible investment (RI).

-As one of the largest asset managers with responsible investment in Japan, we offer a wide variety of RI products to our clients.

-We make distribution companies / institutions and private investors aware of the significance of integrating ESG principles into their long-term wealth management plans through direct communication, seminars and our website.

We are committed to follow the "Principles for Responsible Investment (PRI)" published by the "United Nations Environment Programme Finance Initiative (UNEP FI)" and the United Nations Global Compact since May 2006.

In November 2011, we signed for (*) Principles for Financial Action towards a Sustainable Society (Principles for Financial Action for the 21st Century).

(*)Principles for Financial Action towards a Sustainable Society (Principles for Financial Action for the 21st Century) : This principle has been established in Japan as a Code of Conduct for financial institutions to play a role in establishing necessary steps for a sustainable society. This principle also has been developed to be a starting point to work together with like-minded institutions. Financial institutions signing the above, based on the content of their work, would strive to practice the environmental, social and governance-friendly initiatives.

We have been totally complying with the "Principles for Responsible Institutional Investors (Japan's Stewardship Code)" since its announcement of the acceptance of the code on 30th May 2014. The code was produced by the Council of Experts Concerning the Japanese Version of the Stewardship Code, established by the Financial Services Agency and was publicly disclosed in February 2014.
