RI TRANSPARENCY REPORT

2014/15

Dundas Partners LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

The long term investment focus leads Dundas Global Investors (DGI) towards companies capable of sustained business growth. 'Good business' is good business, i.e. operating as a serious and positive corporate citizen generally usually implies a well-run company. In turn that provides a solid base for better returns for shareholders.

The challenge for investment judgement comes at the intersection of business activities which are permissible/legal and those which are judged negatively by society or important groups.

DGI portfolios are not 'sin free' but do emphasise investments that they consider to be positive and productive for mankind's benefit with the minimum environmental disadvantage.

After three years of running client money and not investing in tobacco or munitions companies we decided during the past year to exclude formally these stocks from our portfolios - this has been embedded in our guidelines. These companies had consistently failed the long term sustainability test we apply and we see no signs of that changing.

This document is reviewed periodically by DGI's compliance committee and annually by the partnership.

Yes

OA 04.2	Describe your policy on managing potential conflicts of interest in the investment process. [Optional]
----------------	--

Purpose

DGI's policy on conflicts of interest ensures that it adheres to its requirement under the FCA's SYSC rules to maintain and operate effective organisational and administrative arrangements with a view to taking reasonable steps designed to prevent conflicts of interest from giving rise to a material risk of damaging clients' interests.

General approach to potential conflicts of interest

DGI is an independent company. Its sole activity is the management of global equity portfolios. Its services

are offered to institutional investors and certain eligible private individuals. DGI does not invest on its own behalf. Thus it avoids many of the potential conflicts of interest which can bedevil organisations that are active in more than one area of investment management or other financial services.

The portfolios DGI manages for its clients all follow the firm's common investment strategy. Even so, not all clients can achieve exactly the same results all the time. Some clients may request variations in the way DGI applies its strategy resulting in differences in the investment results achieved across the client base. For example, a new client may instruct DGI to take time to build the client's portfolio due to market conditions as opposed to establishing it immediately. A client in one country may ask DP LLP to manage the portfolio without securities from that country whereas most other clients do not apply such restrictions.

Such differences and other similar factors are not considered by DGI to represent conflicts of interest. Rather they are a reflection of individual client requirements and DGI's commitment to treat each customer fairly. The firm adheres to the Global Investment Performance Standards of the CFA Institute to calculate and present its performance results, including management of its policy in setting composite performance schedules.

Since the last submission there has been considerable regulatory attention on the conflicts inherent in using commissions generated by client monies to pay for brokerage research used by fund managers. At Dundas we do not enter into any such agreements with commissions only being used to pay for execution. Any external research used by the firm is paid for out of our own budget.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We have chosen an integrated strategy as we believe ESG has a multi-faceted impact on the companies we invest in which cannot be isolated by screening and thematic approaches.

We prefer to undertake a full review of companies which pass our financial and ESG criteria of sustainability rather than apply overarching moralistic judgement which may miss the point. This approach allows companies to change direction and not be penalised for the past.

However in the situations where companies continue to pursue a path which does not adhere to our overarching policy on sustainable growth we will exclude them from our research universe - this was behind the action taken on Tobacco and Munitions stocks this past year.

LEA 04.3

Describe how you monitor and evaluate the progress of your engagement activities.

We monitor our engagement with companies in three ways;

ESG score momentum - An ESG score assessment is built into our fundamental financial analysis tool ,The DGI Grid, showing 18 individual ESG categories. This is reviewed formally on a quarterly basis and momentum is tracked and assessed.

Company visits - We meet many of the companies we invest in, either physically or virtually in this age of video conferencing. Any ESG queries or updates required are provided and assessed for forward momentum.

Responses to our written communication - If we write and receive no reply we always follow up.

- No
