RI TRANSPARENCY REPORT

2014/15

Eyb & Wallwitz Vermögensmanagement GmbH

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.3	Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]
---------	---

We consider the whole capital structure of a company (equity, debt, hybrid capital) and pick the most attractive segment, i.e. equity, senior- or junior-bond. We do not do any kind of speculative investment in agricultural commodities.

Equities

[*] MSCI World with Europe-& US-bias.

[*] We also invest in markets where we do not have inhouse expertise (e.g. emerging markets, small-cap stocks outside Europe) using ETFs or mutual funds.

[*] Primarily investments in companies with good management that have a quasi-monopoly status.

[*] We exploit mispricing using value and momentum strategies.

Bonds

[*] Barclays Cap Euro Aggregate. The Euro-Aggregate Index tracks fixed-rate, investment-grade Euro-denominated securities. Inclusion is based on the currency of the issue, and not the domicile of the issuer. The principal sectors in the index are Treasury, Corporate, Government-Related and Securitised. Besides that we also invest in High Yield Bonds, mostly the so called "Fallen Angels".

[*] Issuer screening based on fundamental and qualitative criteria such as debt, spread and sector analysis but also macroeconomic factors and stock market evaluation.

[*] The selection of individual securities is based on duration and bond covenants.

Liquidity

[*] Cash position is invested at money market terms.

[*] We can hold cash up to a maximum of 49% of the portfolio. However, depending on our current market view, we are allowed to hold more than 49% cash for short periods of time, if necessary.

Futures& Options

[*] We purchase and sell futures contracts and options for hedging purposes (portfolio protection).
