RI TRANSPARENCY REPORT

2014/15

Esmee Fairbairn Foundation

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Provide any additional information about your organisation, its mission, strategies, activities or investments which are important to contextualise your responsible investment activities.

The purpose of our investment portfolio is to generate the maximum return for our grant-making, through which we have made over £500m in awards since 1961. This is particularly important at a time when we have increased spending to meet additional need.

We recognise the importance of responsible investment, and we are taking it on in three ways:

- We use our grant-making to fund organisations like ShareAction, ClientEarth and World Development Markets for their work in advocating for systemic change.
- We allocate part of our balance sheet (our £26m social investment fund) to invest in alternative social and environmental models for the future.
- We believe that application of the United Nations Principles for Responsible Investment will help align our investment portfolio with our mission to improve the quality of life throughout the UK and will also be integral to sustaining positive financial results over the long term.
