RI TRANSPARENCY REPORT

2014/15

ESSSuper

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Taken from the Scheme's Investment Governance Framework policy document

Appendix M: PRI/ESG Policy

It is the objective of the Board of ESSSuper to maximise long term real returns on investments under our control (whilst minimising short term risks) in order to safeguard the long-term interests of the Scheme's members and other key stakeholders (employer groups and Victorian Government).

ESSSuper recognises that whilst striving to achieve the above, that we must also deliver this in a responsible manner. We aim to contribute to a fair community and seek to act in a sustainable fashion in our business activities.

We believe that Environmental, Social and Governance issues (ESG) have the potential to impact the real returns to our members, especially over the long term. As a result we look to systematically consider, understand and manage the ESG issues that have the potential to impact financial performance. We acknowledge that integrating ESG criteria into investment decision making is both an evolving area due to regulatory uncertainty in areas such as climate change and somewhat difficult to gauge accurately, due to a lack of analytical tools to measure the relevant material risks these still largely under development.

However, while research in the area of measuring the financial impact of ESG practices is ongoing we acknowledge that ESG issues may affect the performance of investment portfolios to varying degrees across companies, sectors, regions, asset classes and through time. We accept that companies that perform better with regard to managing ESG issues can increase shareholder value by, for example, properly managing risks, anticipating regulatory action or accessing new markets, while at the same time contributing to the sustainable development of the societies in which they operate. Conversely, companies that are unwilling or unable to take important ESG issues into consideration may deliver diminished investment value over the longer term.

As such it is incumbent upon us to consider ESG risks in our investment decision-making processes. It should be noted that incorporating ESG into our investment decision making is distinguished from ethical investing which may include restricting investing according to ethical criteria (e.g. selecting, divesting/excluding investments purely on ethical or social grounds).

As part of our approach to adopting and incorporating ESG into our investment processes, we are committed to, and comply with, the United Nations Principles for Responsible Investments (UNPRI). As part of being a signatory to the UNPRI, our obligation is to act in the best interest of our investors in accordance to the investment guidelines set by these investors. Where possible, we can and do include ESG considerations into the investment and decision making process. We exercise our voting rights in accordance with our voting policy. Both internally and via our service providers, we encourage counterparties, companies, and issuers to implement best practices in their businesses, including ESG considerations.

Environmental, Social and Governance¹ considerations are made in the investment management process, as part of ESSSuper's fiduciary responsibilities and obligations to its members.

We have an objective to understand and manage ESG issues across all our investments and to promote best practice among the companies in which we currently invest and those in which we may potentially invest. The manner or approach to us achieving this objective is as follows:

- Through being a signatory to the United Nations Principles for Responsible Investment (UNPRI).
- Via voting - exercising our Proxies at Annual (or Extraordinary) General Meetings of companies.
- Through the use of the Governance Advisory Service (Regnan) via Victorian Funds Management Corporation (VFMC).
- Through being a Foundation Member of the Australian Council of Superannuation Investors (ACSI).
- Through active participation in various Industry Conferences, meetings and round tables.

Consideration of ESG is undertaken in accordance within the broad framework provided by the United Nations Principals for Responsible Investment. Within this, ESG issues are incorporated into the investment decision making process and in analysis wherever practicable. Each of the various UN Principles are detailed below, along together with the manner in which we approach, manage and comply with these. It should further be noted that whilst the overarching policy applies to both accumulation and defined benefit funds, the responsibility for the implementation is undertaken separately. For the Accumulation Fund, Implementation is undertaken internally, whilst for the Defined Benefit Funds, VFMC is responsible for the implementation of the Boards Policies, noting as well that a copy of their policies have been reviewed and considered in the formulation of our policies.

UNPRI Principle 1 - Incorporation of ESG issues into investment analysis and in the investment decision making process

ESSSuper supports the development of ESG related research, tools and metrics. We analyse and assess both internally, and through our association with VFMC (the implementation manager of the Defined Benefit Funds) and Investment Advisor, the capabilities of external service providers to incorporate ESG into their decision making process. Via our participation in ACSI, Regnan (via VFMC), and via professional affiliations of its staff² ESSSuper encourages academic and other research into this topic. Through discussions with our managers, consultants and other industry participants, we seek to ensure that company disclosures and corporate governance practices are increasingly considered as core considerations in both manager and broker based company research.

UNPRI Principle 2 - Be active owners and incorporate ESG issues into the ownership policies and practices

ESSSuper has an active ownership policy (refer Stock Voting Policy below) and exercises its voting rights - with voting undertaken internally for Accumulation Fund Domestic Holdings and via one of its investment managers³. For the Defined Benefit Funds, VFMC (and by agreement, several of its managers) vote in accordance with its stated voting policies, which have been presented to the Board. Where ESSSuper invests via a pooled investment vehicle, the manager of the pool retains the right to vote. Via its managers, ESSSuper encourages both direct and indirect engagement with investee companies. Through its indirect support of Regnan and as a founding member of ACSI, ESSSuper promotes and encourages engagement with investee companies and the development of industry based policy formulation, regulation and standards setting. Regnan, on behalf of its constituents, lodges submissions to various commissions dealing with governance issues. ESSSuper has had a long association with other organisations active in the assessment, promotion and protection of shareholder rights⁴.

UNPRI Principle 3 - Seek appropriate disclosure on ESG issues by the entities in which we invest

ESSSuper via its participation in various industry associations (as listed previously in principles 1-3) promotes and supports initiatives and resolutions promoting ESG disclosure as well as the reporting of and consideration of ESG issues by companies.

UNPRI Principle 4 - Promote acceptance and implementation of the Principles within the Investment Industry

ESSSuper, via its participation in various industry associations (as listed previously in principles 1-3) promotes and supports regulatory or policy developments that better enable the integration of ESG into the investment decision making process. These professional bodies have undertaken / sponsored research into ESG factors in the investment decision process⁵. ESG issues are discussed with service providers in periodic reviews.

ESSSuper staff members participate in various Industry based bodies (ASFA Discussion Groups, International Group on Climate Change etc) and actively participate in conferences (e.g. Responsible Investment Association Australasia (RIAA) Conference) addressing these issues. VFMC, as the Investment Manager for the Defined Benefit Fund, has appointed a Governance Manager and several of its staff sit on various industry based committees that raise and deal with ESG issues.

UNPRI Principle 5 - Work together to enhance our effectiveness in implementing the Principles

ESSSuper, via staff participation in various industry associations and bodies, supports and participates in networks to share tools and ideas in this area on a collaborative basis. Via our industry memberships, we fund some of the pooling of resources which promotes learning and research in the area.

UNPRI Principle 6 - Report on our activities and progress towards implementing the principles

ESSSuper will seek to disclose how ESG issues are integrated within our practices (refer above under each principle). We internally report progress against these principles and the outcomes of our proxy voting initiatives. Further we have our external partners and investment managers maintain registers of voting or engagement activities, using these responses to assist in the completion of our benchmarking surveys.

We are contemplating how we may further disclose these activities to our membership base.
