RI TRANSPARENCY REPORT

2014/15

FINANCE-SA

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We strongly believe that incorporating Environmental, Social or Governance responsibility criteria to the fundamental financial approach significantly enhances the evaluation process of a company. This global process in turn decreases the global risk of the portfolio while improving the investor's confidence.

Our active management strategy selects companies that can achieve a tangible, responsible and durable growth. In doing so, we smooth strong market deviations. Whenever possible, we also engage in an active policy aimed at improving the ESG practices of the companies we're invested in.

---	---

Total actively managed listed equities

100%

LEI 03.2 Describe your primary reasons for choosing a particular ESG incorporation strategy.

The investment objective of the fund is to invest in European stocks, we've decided that the ESG screening and integration was the most relevant process to deliver a consistent SRI approach. We've added some satellite strategies like thematic investment mainly on the Environmental aspect (clean tech etc...)

LEI 03.3 Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

Our thematic approach is satellite therefore we consider that the core investment is our selection of stocks that both complies with our financial and extra financial criteria e.g. could it be a best in-class on the ESG side, a listed company that wouldn't fit our financial target won't be included in the portfolio. And vice versa.

(A) Implementation: Screening

LEI 06

Mandatory

- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Sector : We exclude certain type of weapons.

Companies : we exclude companies that violate human rights, international laws (Environment, corruption, etc..)

But we also monitor on a regular basis controversial issues on all ESG aspects for each company. As a consequence all type of companies could be excluded from time to time.
