RI TRANSPARENCY REPORT

2014/15

Foresight Group LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Foresight Group are committed to ensuring that each of the individual projects within the four Institutional Environmental funds which we manage will contribute to the reduction of greenhouse gas (GHG) emissions and/or the reduction of waste being sent to landfill as well as creating full-time equivalent, permanent jobs. It is our policy to build a portfolio of waste sector investments in Commercial and Industrial ("C&I") waste, Materials Recovery Facilities ("MRFs"), Small-scale Anaerobic Digestion ("AD"), CHP and gas-to-grid opportunities; food waste and on-farm AD opportunities; and sustainable virgin biomass based energy projects which will comply with these objectives.

The Foresight Nottingham Fund also seeks to attract regional investment and create jobs within a defined geographical remit.

Foresight Funds have appointed Kent Wildlife to explore the feasibility of maximising the biodiversity and wildlife potential for all of its UK solar assets. The initial phase of the initiative involved undertaking site visits where walkover surveys and preliminary desktop ecological studies were undertaken. The results have been used to prepare scoping reports which identify existing features of wildlife importance and assess the opportunities for biodiversity enhancements that each site offers.

The initial reports have been used for the preparation of a series of site specific biodiversity enhancement and management plans to secure long-term gains for wildlife. The proposals seek to develop a process for enhancing the wildlife potential in the context of local landscape. We will work together to design a bespoke nature conservation management plan for each solar park which will identify the appropriate biodiversity objectives and define the habitats enhancements, regular management and ongoing monitoring activities required to achieve them. Each site will be monitored and reviewed actively by a local member of the Wildlife Trusts movement with ongoing advice provided to the individual Operations and Maintenance managers as and when needed.
