RI TRANSPARENCY REPORT

2014/15

GLG Partners LP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

The Virgin Climate Change Fund, an environmental strategy applying a Trustcost-optimized carbon screen for stock selection, was chosen in order to develop an innovation way to crystallize the carbon footprint of a company into a liability with implications on its valuation. Our expectation remains that as the carbon markets mature, the distortions in the market will gradually diminish.

The sustainability strategies--both long only and long/short--carry broad thematic investment mandates with the objective of use all any/all ESG modalities including single and multi factor quantitative models, qualitative engagements around governance issues and to a lesser extent social issues. The aim is to create a more holistic, flexible framework that can respond to changing conditions and any modulation in the strength of a particular ESG signal.

The other funds--a combination of long/short and long only strategies--don't carry a specific ESG mandate. They do, however, incorporate ESG analysis in non-uniform approach. Asset managers and analysts use the firm's tools and third party data to analyse ESG when it becomes relevant within their industry.

(A) Implementation: Screening**LEI 06****Mandatory****Descriptive****PRI 1****LEI 06.1**

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening
- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

The Virgin Climate Change Fund applies a carbon filter that rates/ranks companies on a sector-neutral basis, determining which stocks it can or cannot own.

The Global Sustainability Fund and a long/short strategy applies positive screening within sustainability themes to determine the best managed/best governed companies or cases where transformational change--financial as well as ESG (particularly governance criteria)--appear imminent.

The mandates for other funds do not include screening.

- Norms-based screening

LEI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Screening for the Virgin Climate Change Fund was established by Virgin and GLG using Trucost data. The criteria is regularly reviewed to assess how it responds to changing prices in carbon and shifting EU political support for a carbon floor. Because the fund is a retail fund with a very large retail base of clients, the Fund is obliged to notify and receive consent from investors of any/all changes.

For the Global Sustainability Fund and its long/short strategy, screening criteria has been intentionally left broad except for the exclusion of areas that do not reflect sustainability. Because of the lack of definition, the universe, themes and positions are reviewed regularly (monthly) and tested intellectually.

LEI 07	Mandatory	Core Assessed	PRI 1
--------	-----------	---------------	-------

LEI 07.1

Indicate which processes your organisation uses to ensure that screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

(B) Implementation: Thematic

LEI 09	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

LEI 09.1

Indicate the type of sustainability thematic funds or mandates that your organisation manages.

- Environmentally themed funds
- Socially themed funds
- Combination of themes

LEI 09.2

Describe your organisation's processes for sustainability themed funds. [Optional]

The process begins by defining sustainability as the investment required to address demographic, environmental and social change. Themes and sectors (GICs) are analyzed for qualification. The process is intentionally kept broad so that new areas--in technology for instance--can be interwoven into the existing framework. With the universe of themes defined, work focuses on building a portfolio per its charter that is concentrated (40-50 positions) that fulfill ESG criteria, with a particularly emphasis on strong or improving governance. The firm typically proxy votes through ISS but the fund and firm will take up specific governance issues with the board and management of companies.

(C) Implementation: Integration of ESG issues

LEI 11	Mandatory	Core Assessed	PRI 1
--------	-----------	---------------	-------

LEI 11.1 Indicate if E, S and G issues are reviewed while researching companies and/or sectors in active strategies.

ESG issues	Coverage/extent of review on these issues
Environmental	<input checked="" type="radio"/> We systematically review the potential significance of environmental issues and investigate them accordingly <input type="radio"/> We occasionally review the potential significance of environmental issues and investigate them accordingly <input type="radio"/> We do not review environmental issues
Social	<input type="radio"/> We systematically review the potential significance of social issues and investigate them accordingly <input checked="" type="radio"/> We occasionally review the potential significance of social issues and investigate them accordingly <input type="radio"/> We do not review social issues
Corporate Governance	<input checked="" type="radio"/> We systematically review the potential significance of corporate governance issues and investigate them accordingly <input type="radio"/> We occasionally review the potential significance of corporate governance issues and investigate them accordingly <input type="radio"/> We do not review corporate governance issues

LEI 11.2 Additional information. [Optional]

Because GLG includes a number of different funds, subfunds and strategies, there is no systematic or uniform approach to addressing ESG issues. Hence, some funds investigate these criteria consistently and rigorously while other strategies approach these issues more opportunistically.

Communication

LEI 18	Mandatory	Core Assessed	PRI 2,6
--------	-----------	---------------	---------

LEI 18.1 Indicate if your organisation proactively discloses information on your approach to ESG incorporation in listed equity.

- We disclose it publicly
- We disclose it to clients and/or beneficiaries only
- We do not proactively disclose it to the public and/or clients/beneficiaries

Outside of the Virgin Climate Change Fund and Global Sustainability funds, we do not disclose the information primarily because of low interest from investors.
