RI TRANSPARENCY REPORT

2014/15

Hauck & Aufhäuser (Schweiz) AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2	Describe your primary reasons for choosing a particular ESG incorporation strategy.
----------	---

We have launched our first SRI fund in 1995 - as at the time, in Continental-Europe there was no holistic approach on ESG issues (only funds with a strong "eco-focus" or "social-focus"). Investment processes traditionally factor the basic requirements such as security, liquidity and yield into the mix. Our investment ethics approach combines these "traditional" criteria with new ethical norms. These arise from the social importance of companies and from the principles of good corporate citizenship. The aim is to have reliable and profitable investment behavior which is also socially and ecologically responsible. Additionally, it should favor sustainable entrepreneurial value creation.

(A) Implementation: Screening

LEI 06	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
 Activity
 Sector
 Country/geographic region
 Environmental and social practices and performance
 Corporate governance

Description

Companies and issuers are excluded from the investment universe, which:

do not comply with human rights
 produce, use or distribute military goods and arms
 or are involved with socially controversial technologies or products (e.g. genetic engineering, nuclear power)

The following activities may also exclude companies from investing:

gambling, alcohol/tobacco
 pornography
 harmful chemicals
 destructive exploitation of natural resources
 processes and products based on fossil fuel combustion

However, these business activities can be counterbalanced by positive criteria if they account for less than 10% of turnover.

The Ethics Committee defined a document containing a list of exclusion criteria with a detailed comment to every criterion.

- Positive/best-in-class screening

Screened by

- Product
 Activity
 Sector
 Country/geographic region
 Environmental and social practices and performance
 Corporate governance

Description

We look at every company from ethical perspectives (with 5 sub-aspects in each case):

- Conscious responsible behavior (e.g. corporate governance, management principles)
- Products and services rendered (e.g. business model, consumer protection)
- Processes (e.g. production, supply chain, CRM, human resources)

- Protection of natural resources (e.g. environmental management system, life cycle analysis)
- Transparency and Reputation (e.g. well deserved reputation, image, corruption)

Norms-based screening

Screened by

- UN Global Compact Principles
- Universal Declaration of Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Description

Inhouse research works according to a methodology which was confirmed by the Ethics Committee. The above mentioned principles and conventions are integrated in this methodology.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

The criteria of our methodology are constantly reviewed by the Ethics Committee during the monthly meetings. We do not actively notify clients or beneficiaries about changes but research reports can be published on demand.

LEI 07	Mandatory	Core Assessed	PRI 1
---------------	------------------	----------------------	--------------

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

(B) Implementation: Thematic

LEI 09	Mandatory	Descriptive	PRI 1

Describe your primary reasons for choosing a particular incorporation strategy.

The strategy has been launched in 1995 and has been refined during the years.

(A) Implementation: Screening

FI 06	Mandatory	Descriptive	PRI 1
-------	-----------	-------------	-------

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

	Description
--	-------------

Companies and issuers are excluded from the investment universe, which:

- do not comply with human rights
- produce, use or distribute military goods and arms
- or are involved with socially controversial technologies or products (e.g. genetic engineering, nuclear power)

The following activities may also exclude companies from investing:

- gambling, alcohol/tobacco
- pornography
- harmful chemicals
- destructive exploitation of natural resources
- processes and products based on fossil fuel combustion

However, these business activities can be counterbalanced by positive criteria if they account for less than 10% of turnover.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

	Description
--	-------------

We look at every company from ethical perspectives (with 5 sub-aspects in each case):

1. Conscious responsible behavior (e.g. corporate governance, management principles)
2. Products and services rendered (e.g. business model, consumer protection)

3. Processes (e.g. production, supply chain, CRM, human resources)
4. Protection of natural resources (e.g. environmental management system, life cycle analysis)
5. Transparency and Reputation (e.g. well deserved reputation, image, corruption)

Norms-based screening

FI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Regular review of the research process by the Ethics Committee. The ESG criteria are examined in the monthly Ethics Committee conferences and - if necessary, and after careful consideration - expanded or adapted.

FI 07

FI 07.1

Indicate which processes your organisation uses to ensure that screening in corporate fixed income is based on robust analysis.

- Comprehensive research is undertaken or sourced to determine issuers' ESG performance
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify issuers to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Information on ESG issues and/or ratings is updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct ESG research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above
