

RI TRANSPARENCY REPORT

2014/15

HEXAM CAPITAL PARTNERS LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

ESG issues are embedded in the HEXAM Investment Process. Within HEXAM's GLCMV investment approach, Management, (M) is key to the sustainability of returns. The HEXAM team has sufficient experience to assess markets and stocks given the above, while providing a judgment overlay. Within this context, corporate governance and social factors are always seriously considered both on the sovereign and corporate levels. To list just a few in no particular order:

- Property Rights Legislature
- Minority Shareholders protection
- Political stability
- Usage of child labor
- Gambling
- Weaponry/Cluster munitions
- Environmental care
- Alcohol/tobacco
- Corporate governance record
- Iran/Sudan "dealings"

Additional information. [Optional]

~~HEXAM does not run a quantitative evaluation of ESG factors on the investment results of the fund. However, ESG factors play an overriding role in both asset allocation decisions (political/regulatory issues) and in stock selection decisions (corporate governance issues and other ESG factors). Furthermore, HEXAM is known to zero weight some of the largest stocks in the benchmark due to ESG concerns despite potential impact on performance. This can happen when a stock with a large weight in the index is prohibited by HEXAM ESG investment guidelines but is favored by other investors in the peer group. One example could be alcohol/brewery producers. These stocks are considered "defensive" due to typically high dividend yield and stable profit margins and they attract large inflows especially during economic down cycles.

Also, it is worth mentioning that the HEXAM team, both at HEXAM and previously, had never had a loss of investment due to ESG issues (e.g. the team avoided the Yukos disaster in Russia) and are always cognizant of the ethical aspect of investing. HEXAM voluntarily became a signatory to UN PRI.

ESG is not merely about performance. HEXAM's view is also a question of morality which sometimes may lead to underperformance against the index or peer group over time, albeit short periods.
