# RI TRANSPARENCY REPORT

## 2014/15

Hotchkis and Wiley Capital Management, LLC

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Our primary objective is to generate superior risk-adjusted returns for our clients. As such, we do not exclude securities as potential investments for social reasons unless these reasons conflict with our primary objective of performing well for our clients. However, we acknowledge that a company's approach to environmental, social, and governance ("ESG") issues can affect investment performance and risk. Consequently, we believe consideration of ESG factors in investment decisions can provide multifaceted benefits not only to investors but also to society.

As part of our investment process, a designated investment team member, the Portfolio Analyst, regularly screens investments across all strategies for environmental, social, and governance criteria. The screen is designed to compare ESG criteria of individual companies to competitors in the same industry group, with adjustments made for company size. The report is disseminated to the entire investment team along with the company's Responsible Investment Policy periodically, (generally quarterly). Additionally, analysts will incorporate ESG issues into their analysis (models, risk assessment, etc.) when relevant.
