

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

---------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

At IPM we integrate ESG factors into the equity investment process. A part of our active weights in the Fund comes from the Governance & Quality screen that in a systematic fashion penalizes companies with aggressive accounting standards and other signs of lax corporate governance.

Additionally, the Fund is screened for compliance with international conventions and guidelines on environment, human rights and business ethics such as UN Global Compact, OECD Guidelines for Multinational Enterprises, ILO Core Labour Conventions, Environmental Conventions, Weapons-related Conventions. Non-compliance is handled through a process of engagement and exclusion.

To cover for the lost exposure due to the exclusions, with the use of an optimizer, the Fund applies a "best-in-class" approach that overweights companies with similar characteristics but in compliance with the norms.

We are active owners. In addition to our engagement efforts with all companies in our investment universe that violate the well-established international guidelines and conventions, the Fund incorporates proxy voting services according to best corporate governance standards into its ESG program.

LEI 03.2	Describe your primary reasons for choosing a particular ESG incorporation strategy.
----------	-------------------------------------------------------------------------------------

1) Integration: As one of factors in our active equity products, we use a Governance & Quality factor which among others looks at aggressiveness of accounting standards used by companies. Aggressive accounting may be a sign of lax governance standards and/or unethical corporate practices. This metric is used to calculate a factor that will reduce the portfolio weight of companies applying aggressive accounting and increase the portfolio weight of companies showing more prudent accounting practices.

Our research and live trading results show that this screen consistently adds value over time.

2) Screening: We screen our active equity portfolios for their compliance with international conventions and guidelines on environment, human rights and business ethics such as UN Global Compact, OECD Guidelines for Multinational Enterprises, ILO Core Labour Conventions, Environmental Conventions and Weapons-related Conventions. For this purpose we use GES Global Ethical Standard research process. As a result of the screening, all companies involved in cluster munitions and anti-personnel mines are directly excluded. All companies violating the well-established international norms and not responding to our engagement efforts are also excluded. To cover for the lost exposure due to exclusions, with the use of an optimizer we apply a best-in-class approach and overweight companies with similar characteristics but in compliance with the norms. Companies that have fully remedied all violations, adopted a responsible course of action and took proactive and precautionary approach to improve routines and prevent future violations are eligible for re-inclusion.

LEI 03.3

Weapons-related Conventions

Description

We screen the equity portfolios for their compliance with international conventions and guidelines on environment, human rights and business ethics such as UN Global Compact, OECD Guidelines for Multinational Enterprises, ILO Core Labour Conventions, Environmental Conventions and Weapons-related Conventions.

As a result of the screening, all companies involved in cluster munitions and anti-personnel mines are directly excluded. All companies violating the well-established international norms and not responding to our engagement efforts are also excluded.

Companies that have fully remedied all violations, adopted a responsible course of action and took proactive and precautionary approach to improve routines and prevent future violations are eligible for re-inclusion.

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------

The IPM ESG Committee decides on engagement, exclusion and re-inclusion cases at IPM. The Committee meets at least on a semi-annual basis. The basis for the analysis is the GES Global Ethical Standard research process. However, the Committee will also consider other relevant information in their analysis of recommendations.

The IPM ESG Committee follows the established guidelines for engagement, exclusion and re-inclusion decisions. According to these guidelines, all companies involved in cluster munitions and anti-personnel mines are directly excluded. All companies violating UN Global Compact etc. and which do not show clear signs of progress within 1 year from first violation reported, or do not fully remedy the violation within 3 years are excluded. Companies that fully remedy all violations are eligible for re-inclusion. These are operating guidelines, and the IPM ESG Committee may deviate from them if it decides that the behaviour of the companies warrant quicker exclusion or further patience before taking action.

Relevant changes to the client portfolios are communicated in client reports/calls etc.

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
----------	-------------------------------------------------------------------------------------------------------

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out

The IPM ESG Committee is responsible for overseeing all responsible investment efforts at IPM. The objective of the IPM ESG Committee is to provide advice and guidance on IPM's activities within the area of responsible investment and to decide on engagement, exclusion and re-inclusion cases at IPM.

The basis for the analysis and recommendations made by the Committee is the GES Global Ethical Standard research process, provided by GES. However, the Committee will also consider other relevant information in their analysis of recommendations (including results of IPM's own and collaborative engagement efforts).

The Committee meets at least on a semi-annual basis. At each meeting special attention is drawn to new confirmed cases on the GES Engage Cases List. Companies in our investment universe that have been officially documented systematically and severely breaching any of UN Global Compact's 10 Principles and other well-established international guidelines and conventions are put on special watch. The Committee will carefully study these companies in order to verify any signs of progress in improving their conduct. Lack of improvements over a period of 1 year (neither satisfying 1 out of 4 GES revision criteria per year, nor presenting any documented proof that confirms significant improvements) or remaining on the GES Engage Cases List for more than 3 years is deemed a sufficient reason for the IPM ESG Committee to recommend exclusion of that company from the investment universe.

All companies excluded from the investment universe will remain excluded until they are recommended for re-inclusion by GES, unless the Committee decides there are extraordinary circumstances that warrant an earlier re-inclusion. Only circumstances related to an improvement in company's conduct will be taken into account.

All companies which are included in the Re-Include Cases List will be reviewed by the Committee for possible recommendation for re-inclusion in the investment universe.
