RI TRANSPARENCY REPORT

2014/15

Keensight Capital

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

For over 15 years, the Team has been delivering value to investors by backing management teams to build stronger and more valuable businesses. A focus on their long-term sustainability is at the centre of what we do. We believe that having a responsible and proactive approach to sustainability will positively impact the performance and success of the funds' portfolio companies. As such, we expect consideration of the environmental and social impact of our funds' activities to be part of the governance of the funds' portfolio companies.

This focus sets out our approach to Environmental, Social and Governance ("ESG") issues that has been established in line with the United Nation's Principles for Responsible Investment ("UN PRI") which the Team is a proud signatory. This approach has been formalized in the six pillars for our ESG policy which is displayed on our website.

The Team conducts its activities in accordance with both the letter and the spirit of these six pillars. We also work on disseminating these principles into each portfolio company of our funds.

In order to ensure an efficient deployment of our ESG philosophy, a Keensight Capital partner has been placed in charge of all ESG related topics and all partners and staff have been trained on ESG issues.

To improve our communication on ESG issues, we enriched our annual report with a specific ESG section.

As an illustration of these principles, the ESG criteria are taken into account in each step of our investment approach:

- ESG assessment is an integral part of our due diligence process. In certain cases, a specific care will be brought on certain matters. Some investments are for example examined specifically with respect to environmental aspects ("Environmental Due Diligence");
- An ESG clause is incorporated into the shareholder agreement, in order to prevent certain misconducts;
- In order to create measurable performance improvements, the Team developed a questionnaire and a scorecard for its portfolio companies in accordance with the AFIC recommendations. The ESG questionnaire is used during the due diligence process and then sent out annually to the portfolio companies. The resulting ESG scorecard helps measure the portfolio companies' performance and progress.
- The Team then actively supports the portfolio management teams in working on ESG issues and bringing about improvements.
