RI TRANSPARENCY REPORT

2014/15

London Pensions Fund Authority (LPFA)

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We stated in our Statement of Investment Principles that

Given the duration of our liabilities, we are responsible long term investors.

We wish to encourage environmental, social and corporate governance best practice in the companies in which we invest, as we believe this will deliver the best long term returns.

A fund management approach that incorporates the evaluation of ESG risks and opportunities is more likely to result in long term benefits for the Fund.

Scope and process	We were to review the fund manager's investment philosophy, in house policy, implementation and process, and past examples of successful and failed investments. Our process included site visit, speaking to the Fund's dedicated ESG experts and gained an understanding of their ESG policy. We also looked at their past ESG related successful and failed investments. We take an advisory role of the Fund and continue to follow their ESG publications and work in the wider ESG field.
Outcomes	We were satisfied that this fund would fulfill our investment criteria (financial and ESG) and made an investment in this Fund.

Provide a brief overview of how you incorporate ESG issues into listed equity investments.

We wish to encourage ESG best practice in the companies we invest in. ESG is an investment consideration in that we want to see shareholder value compounded over the long term. Corporate management should ensure the business is focused on the durability of the business model.

LEI 03.2	Describe your primary reasons for choosing a particular ESG incorporation strategy.
-----------------	---

We are responsible long term investors who believe that ESG best practice in the companies in which we invest will deliver the best long term returns. We do not, however, wish to exclude sectors of the investment universe. As a pension fund we have a fiduciary duty to make investments where we see the best return for our stakeholders. We strive to reach these maximum returns in a responsible way and we pride ourselves on our responsible investing strategy. That is, as a large investor, we encourage responsible long-term behaviour in the companies in which we invest and through the mandates we give to our fund managers. However, we must ensure that investments we make are in accordance with our fiduciary duty and not made for any other purpose. Responsible investment factors, such as low carbon, may be relevant as an additional consideration. However, screening out stocks for investment/divestment on ethical grounds only is in conflict with the Board's fiduciary duty if the decision risks significant financial detriment to the fund.
