RI TRANSPARENCY REPORT

2014/15

Meeschaert Asset Management

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

ESG incorporation in actively managed listed equities

Implementation processes

LEI 03	Mandatory	Gateway/Core Assessed	PRI 1
--------	-----------	-----------------------	-------

- All three strategies combined
- No incorporation strategies applied

Percentage of active listed equity to which no incorporation strategy is applied - you may (estimate +/- 10%)	 80
---	--

Total actively managed listed equities

100%

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Our first SRI fund has been created in the early 1980s, following religious clients' demands. We have since developed a wide range of SRI funds convinced that ESG criteria were necessary to better understand the firms we were investing in. For dedicated funds, the main reason is to meet client demands: that is why screening as well as best-in-class criteria are adapted according to their own ethical convictions.

LEI 03.3

Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

First, exclusion is based on activities: companies are excluded if more than 5% of their turnover are made in activities that can lead to addiction mechanisms, which undermine human dignity or which are likely to promote arms trafficking and the resurgence of armed international conflict. 2 . "Best in class" is applied on sectorial analysis: according to a grid with ESG criteria (environmental, social, societal and governance) differently weighted depending on the sector. We analyze all different stakeholders' relationships affected by the activity (suppliers and subcontractors, shareholders, customers, public authority, employees and unions, civil society, local communities and environment).

(A) Implementation: Screening

LEI 06

Mandatory

Descriptive

PRI 1

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Weapons, tobacco, alcohol, pornography, gambling

Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Sectorial best-in-class (based on Environmental and social practices and performance) + positive integration in activities with practices in line with sustainable development

Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

Screening criteria are established in cooperation with our stakeholder partners. Other criteria can be integrated when a new issue appears (for example, tax transparency). This review is thus an ongoing process. Modifications are notified to beneficiaries during client meetings and withing transparency codes.

- Thematic + integration strategies
- Screening + thematic strategies
- All three strategies combined
- No incorporation strategies applied

Percentage of active corporate fixed income to which the strategy is applied (estimate +/- 10%)	%
	65

Total actively managed fixed income - corporate

100%

FI 04.2	Describe your primary reasons for choosing a particular incorporation strategy.
----------------	---

Our first SRI fund has been created in the early 1980s, following religious clients' demands. We have since developed a wide range of SRI funds convinced that ESG criteria were necessary to better understand the firms we were investing in. For dedicated funds, the main reason is to meet client demands: that is why screening as well as best-in-class criteria are adapted according to their own ethical convictions.

FI 04.3	If assets are managed using a combination of ESG incorporation strategies, describe briefly how these are used in combination. [Optional]
----------------	---

First, exclusion is based on activities: companies are excluded if more than 5% of their turnover are made in activities that can lead to addiction mechanisms, which undermine human dignity or which are likely to promote arms trafficking and the resurgence of armed international conflict. 2 . "Best in class" is applied on sectorial analysis: according to a grid with ESG criteria (environmental, social, societal and governance) differently weighted depending on the sector. We analyze all different stakeholders' relationships affected by the activity (suppliers and subcontractors, shareholders, customers, public authority, employees and unions, civil society, local communities and environment).

(A) Implementation: Screening

FI 06	Mandatory	Descriptive	PRI 1
--------------	------------------	--------------------	--------------

FI 06.1	Indicate and describe the type of screening you apply to your internally managed active corporate fixed income investments.
----------------	---

Type of screening

Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Weapons, alcohol, tobacco, pornography, gambling

Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

	Description
--	-------------

Sectorial best-in-class selection is made from ESG practices and performances. We foster companies that promote sustainable development from their sector or their activities

- Norms-based screening

FI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------------	---

The screening criteria are established according to our 2-step-approach: exclusion and best-in-class. Exclusion criteria are mainly alcohol, tobacco, gambling, weapons and pornography. For some dedicated funds these criteria can differ (some clients want to exclude other activities such as stem cell research for exemple). Regarding best-in-class criteria, ESG weighing depends on sectors.

The selection process for states is based on four major themes (equal weight): environmental quality, societal and social conditions, good governance and policies. We use:

- Environmental performance indicators: EPI ("Environmental Performance Index"), established in 2005 by academics from Yale and Columbia. It aggregates a set of indicators measuring the ability of countries to protect the environment.
- Carbon footprint (academic source), to measure all greenhouse gas emissions from the production of goods and services consumed in the country, as well as those issued at the time of consumption.
- Rate of risk of poverty after social transfers (Eurostat)
- Unemployment rate (from the calculation made by the Statistical Office of the European Union)
- Wage gap men / women
- Index of perception of corruption (by Transparency International)
- World Governance Index (by "Forum for a New World Governance", a platform that brings together civil society), relative to Peace and Security, rule of law, Human Rights and Participation, Sustainable development and human development
- Financial Secrecy Index (developed by a coalition of non-governmental organizations: International Network for Tax Justice ("tax justice network"))
- Freedom of the press (by Reporters without Borders)
- Global Peace Index (established in 2007 by the "Institute for Economics and Peace", the global index of the class peace 149 countries by the aggregation of 23 sub-indicators grouped into three major themes: domestic and international conflicts ongoing security in society and militarization)
- Human Development Index (calculated by the OECD)
