RI TRANSPARENCY REPORT

2014/15

MBK Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

MBKP views responsible investment as an important aspect of its investment approach. We believe that responsible corporate behavior with respect to environmental, social and governance ("ESG") factors can generally have a positive influence on long-term financial performance. Our investment team integrates ESG analysis into our investment process by carrying out specific due diligence before making an investment decision and continuous ESG assessment throughout the investment period. The tools and methods used for identifying and assessing such issues are:

Market Data Search - We engage various service providers across different countries and industries for an extensive search database. This provides our investment team with easy access to relevant data when identifying and assessing ESG issues.

Screening - We do not invest in companies that: violate applicable local laws and regulations or produce illegal products; are involved in child labor; produce or sell pornography; engage in the production of arms or munitions primarily designed for military purposes; or pose imminent environmental threats.

ESG Risk Advisor - We hire external ESG specialist for more detailed analysis if certain level of risk is identified.

Approval - We prepare ESG assessment section in the Investment Memorandum. We analyze all the potential risks or potential value creation from the ESG issues. Investment committee's approval on this ESG section is required before making an investment decision.

ESG action plans - After acquisition, ESG action plans or improvement programs would be integrated into the regular "100 day plan". We mandate internal audit departments within its portfolio companies to actively review proper implementation of the ESG organizational requirements as part of their auditing duties.

ESG implementation - Specific ESG-related regulations are not commonplace among our portfolio companies. However, through regular communication with and reporting from portfolio companies' management and operation levels, we are able to assess the level of ESG implementation. In certain situations, third party experts are also invited to review ESG issues. to be confirmed
