# RI TRANSPARENCY REPORT

## 2014/15

New Amsterdam Partners

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

<b>LEI 03.2</b>	Describe your primary reasons for choosing a particular ESG incorporation strategy.
-----------------	---

We consider ESG factors for every stock we consider, regardless of whether or not it is intended for a portfolio with specific ESG guidelines. We believe that favorable ESG characteristics have a meaningful impact on a company's long term profitability and viability, and we have published research which documents this.

### (A) Implementation: Screening

LEI 06	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

<b>LEI 06.1</b>	Indicate and describe the type of screening you apply to your internally managed active listed equities.
-----------------	--

### Type of screening

- Negative/exclusionary screening

### Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

	Description
--	-------------

Our screening explores a wide range of issues, and the depth and breadth of the evaluation relates to a certain degree to the attitude of the client. ESG factors are relevant for every stock we look at for every client. However, some clients in our SRI portfolios want us to exclude all alcohol, tobacco, gambling, military contracting and nuclear exposure. We think in some cases, companies in these businesses may have a place in another client's portfolio, i.e., there may be "offsets" that allow that company to represent a long-term sustainable investment. In a more general sense we would focus on ensuring companies have no serious concerns regarding community, diversity, employees, environment and operations/products.

- Positive/best-in-class screening
- Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------	---

For clients with specific ESG concerns, screening criteria and guidelines are established and agreed upon at the inception of the relationship jointly between the client and the client service team, which will work closely with the portfolio management team. In the rare event that any changes would be made to the guidelines without initial consultation with the client, the client would be notified immediately.

LEI 07	Mandatory	Core Assessed	PRI 1
--------	-----------	---------------	-------

**LEI 07.1**

Indicate which processes your organisation uses to ensure that screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

## (B) Implementation: Thematic

**LEI 09**
