RI TRANSPARENCY REPORT

2014/15

Oasis Group Holdings

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Additional information. [Optional]

Responsible investing and being an active shareholder is a core part of our investment process. Our investment strategy focuses on long-term sustainable returns and as part of this strategy our RI objectives are reviewed and assessed on an ongoing basis. This includes ensuring that we cast our votes for every single company in our portfolio and engaging with management/board of directors where we feel that environmental, social or governance risk exists which could impact the long-term sustainability of the business.

The objectives and on-going engagements/issues are discussed at length in our bi-weekly Corporate Actions Committee meeting which is attended by all the senior executives, the legal/compliance department, the portfolio administration department and members of the investment team.

Additional information. [Optional]

Oasis remains at the forefront of the successful application and marketing of a responsible investment philosophy. Oasis has been instrumental in engaging with the highest level of government in South Africa to facilitate the development of responsible investing. Such engagement includes the involvement of the Oasis Board with the National Treasury of South Africa. Furthermore, Oasis has actively engaged with the Financial Regulator of South Africa and Ireland to promote the development of socially responsible investment principles. Oasis has been involved in promoting the understanding of such products to the respective regulators, to ensure that an enabling environment is created to allow socially responsible investment to flourish in the jurisdictions in which the group operates. As a board member of the Association of Savings and Investment South Africa (ASISA), Oasis has continued to make a case for responsible investment and believes that the principles of responsible investment are highly relevant in the current environment.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We look for companies which have the ability to deliver a high level of sustainable return over the long-term. Consequently, we screen for companies which not only have strong operational and financial metrics, but also companies which have sound ESG practices thus allowing for sustainable shareholder wealth creation over the long-term. At the same time, we analyze ESG factors to identify possible risks/opportunities and integrate that into our investment decision making process in our valuations and risk exposures.

Furthermore, we have a Shariah compliant range of investment products and as a result, we have strict Shariah rules which need to be met before we consider investing /staying invested in a specific underlying investment. As a consequence, we do apply negative/exclusionary screening based on product and activity of the underlying investment. The process is deemed confidential in nature but includes a strong bias towards responsible investing. We also have an independent Shariah Board who scrutinizes our Shariah compliance once a year and determines whether we meet the strict ethical investment guidelines prescribed by the Shariah board.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

When undertaking due diligence on a potential investment, the firm considers all aspects of the investment decision and includes a review of the industry/sector issues, operational issues, management, financial position, performance over the long-term and ESG factors. We believe that companies which adopt responsible investment practices, including adopting low risk business strategies and adherence to social and good governance principles are more likely to be successful. Thus we overlay a review of these factors in our investment decision making process. As part of our investment philosophy we favor/look for companies which have strong market leadership positions, ability to convert market leadership into profit leadership and has best-in-class ESG practices to ensure the sustainability of that profitability.

Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

Our investment philosophy has been consistent since inception. We continuously review our investment philosophy based on our performance - our historic performance indicates that our focus on downside protection and sustainability of long-term returns has resulted in outperformance and lower volatility. We see no need to make any changes to our investment philosophy or our screening methodologies.

Process for engagements run internally

LEA 03	Mandatory	Core Assessed	PRI 2
--------	-----------	---------------	-------

LEA 03.1	Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.
----------	---

☉ Yes

LEA 03.2

Describe how you identify and prioritise engagements.

Our engagement process consists of direct engagement with the company and during these meetings, we will address all pertinent ESG matters. Should we believe that an issue is not amicably resolved, we will undertake further steps such as direct engagement with the company's chairman and / or independent non-executive directors. Oasis also has a detailed proxy voting process whereby we will not hesitate to vote against any matter which we believe does not fit our ESG policy. From time to time, where management and board decisions are not in the best interests of shareholders (including ESG matters), we will publicly engage with the respective company and raise issues which we feel should be highlighted. Identification of issues also comes through our analysis of annual report and ESG disclosures, where the respective analysts are responsible for highlighting issues which are not in line with best global practices.

All ESG matters are discussed in detail at our Corporate Action Committee which is chaired by our Chairman and which is attended by our Chief Investment Officer, our Head of Compliance and the relevant analysts responsible for a specific company in question. During these meetings we will discuss ESG matters, whether it fits our strict policies, the level of engagement required / the outcome of these engagements (if already happened) and the follow-up action required (if any). All engagement is also presented to the investment team in the daily morning meeting along with progress on the engagement process and the outcome.
