RI TRANSPARENCY REPORT

2014/15

Portfolio 21 Investments

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2	Describe your primary reasons for choosing a particular ESG incorporation strategy.
----------	---

We live in a time when environmental considerations have become significant for all of us. As corporations compete for diminishing natural resources, leading companies are adapting their business practices and will demonstrate competitive advantages.

LEI 03.3	Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]
----------	--

Portfolio 21 fully integrates our proprietary ESG research into each investment decision. Further we use screening in two ways: 1) we use ESG databases to screen the global equity universe for attractive companies and 2) we utilize our negative screens to eliminate companies operating in unattractive ESG areas. We use the thematic approach to find companies in certain areas that are innovative and provide products and services that contribute positively to the world's ESG needs.

(A) Implementation: Screening

LEI 06

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
 Activity
 Sector
 Country/geographic region
 Environmental and social practices and performance
 Corporate governance

Description

We believe certain industries and business activities are too environmentally risky or present social outcomes that are too unattractive to warrant investment consideration.

Following are the industries and companies we avoid on this basis:

Agricultural Biotechnology
Alcohol
Gambling
Nuclear Energy
Tobacco
Weapons
Extractives (fossil fuels and mining)

- Positive/best-in-class screening

Screened by

- Product
 Activity
 Sector
 Country/geographic region
 Environmental and social practices and performance
 Corporate governance

	Description
--	-------------

Utilizing our sector research we identify global equities that meet our initial, high level ESG and financial screens. From here, we further analyze these companies against our industry or sub industry thesis and industry specific ESG indicators. Utilizing a range of resources including company published data, ESG and financial analytics, governmental and non-governmental websites, news portals and non-profits, Portfolio 21 conducts in-depth company specific research. Applying our proprietary criteria and scoring methodology each company is evaluated, global leaders are identified, and final investment recommendations made.

Norms-based screening

LEI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
-----------------	---

Our environmental scoring criteria were established using The Natural Step in 1999. Since then we have updated our environmental criteria on three occasions; however, Portfolio 21 views these criteria as core and therefore do not see continuous editing necessary. Our specific sector ESG indicators, however, are updated on a continual basis to reflect changes in the sector, product demand, technological upgrades, etc.

LEI 07	Mandatory	Core Assessed	PRI 1
---------------	------------------	----------------------	--------------

LEI 07.1	Indicate which processes your organisation uses to ensure that screening is based on robust analysis.
-----------------	---

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above
