RI TRANSPARENCY REPORT

2014/15

Prudential Portfolio Managers

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

We believe the analysis of ESG issues is important for our clients as value can be unlocked, and risks mitigated, through understanding the impact of ESG issues upon our clients' assets. We differentiate in our investment process between socially conscious investing, which is in our view based upon the emotive response to a particular issue, and socially responsible investing, which is in our view to objectively understand the impact of the issue upon value of the underlying asset, and ensuring we invest responsibly for clients in terms of our fiduciary duty to unlock value at reasonable price.

We also consider ourselves accountable market practitioners, and even where we do not hold assets in our domestic market that are impacted by ESG, we regularly engage with the management or other shareholders of such listed entities, or the entities themselves where they are bond issuers, alternatively we will engage regulators and policy makers. This could be on issues that impact upon the underlying value of assets, or are simply ethically unacceptable market behaviour.

LEA 03	Mandatory	Core Assessed	PRI 2
--------	-----------	---------------	-------

LEA 03.1	Indicate whether your organisation has a formal process for identifying and prioritising engagement activities carried out by internal staff.
----------	---

☉ Yes

LEA 03.2

Describe how you identify and prioritise engagements.

ESG issues are highlighted in research meetings by the relevant analysts and prioritised by the Chief Investment Officer and Head of Equity where the engagement needs to be at a regulatory or public level. Many engagements are done by the individual analysts themselves when the issue does not warrant a public statement, legal action, or approaching a regulator, and the results of these engagements are highlighted at the research meetings.

LEA 04.3

Being a small investment universe of listed equity in South Africa, this is done relatively easy as engagements on ESG issues can be easily recorded and monitored by the relevant investment analyst. We also report on engagements to a particular group of clients who request extensive reporting annually on engagements, so records are kept for this purpose.

FI 04.2

Describe your primary reasons for choosing a particular incorporation strategy.

Our fixed income markets are overwhelmingly South African. The corporate credit market is (relative to developed or large countries) small. We are therefore able to analyse each new credit issue that comes to market. For our overseas fixed income (non SA) investments, we screen by region, and have underlying managers within those regions that manage the fixed income assets.
