RI TRANSPARENCY REPORT

2014/15

Platypus Asset Management Pty Ltd

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Platypus strongly believes that ESG factors are relevant to the investment process, especially for ensuring the long term performance of a company.

We view ESG factors as an extension of the risk assessment component that has always been integral to our qualitative investment management process. Given our in-depth knowledge of the companies in which we invest, we have developed a proprietary model, rather than outsourcing ESG analytics.

Our approach is to identify E, S or G factors that may have a material impact on company valuations and take action accordingly.

This can range from not investing in the first instance, to actively engaging with company management to facilitate change where a position is already held, or exiting a position if an issue is not satisfactorily resolved.

Engagement

Overview

LEA 01	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

LEA 01.1 Provide a brief overview of your organisation's approach to engagement.

Platypus engage with companies in regard to ESG factors on various levels:

1. Direct with companies we are investing/considering investing in, in order to understand and make an informed assessment on ESG risk factors.
2. Direct with companies we are holders of, where an issue ESG has been identified that requires explanation/resolution/ change to the company's processes. Our aim is to positively influence the companies practices, if a satisfactory outcome cannot be obtained we will consider divesting our position.
3. In conjunction with other PRI signatories, such as our current position on the UNPRI Australian Unconventional Gas Working Group, to promote best ESG practice on broader sector issues.

Engagement is generally undertaken with senior management and board members of these companies. Platypus Portfolio Managers, Stock Analysts and the ESG Analyst will be involved with direct company engagement. The ESG Analyst covers broader engagement issues on the UNPRI working group.
