RI TRANSPARENCY REPORT

2014/15

Santander Pensiones, Entidad Gestora de Fondos de Pensiones, S.A.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

We use the strategy of screening because the goal is to obtain an overall assessment of the company in ESG, in order to subsequently make a comparison between companies in this area.

(A) Implementation: Screening

LEI 06	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

LEI 06.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

The exclusionary criteria are very small and before applying we try to communicate with the company where we have detected to give us more information about it and give us their opinion about the activity we have detected and we do not like.

In environmental matters, the alert criteria are: bad use of nuclear and toxic waste treatment, pollution and environmental pollution.

Human rights: child labor, breach of fundamental human rights.

In other matters: manufacture and sale of the product in whole or in strategic parts of it, in the case of nuclear weapons, cluster bombs and landmines. Also irresponsible or misleading advertising in relation to alcohol, tobacco, pornography and gambling

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

We use the information from EIRIS, and based on these data we developed our analysis ESG. In each area we analyze different indicators.

- Environment: Environmental policy, management and reporting, biodiversity, water pollution, sustainable timber, greenhouse gases ...
- Corporate governance: bribery and corruption, codes of ethics, responsibility to stakeholders ...
- Human rights: Policy, compliance and respect of international treaties ...
- Stakeholders: Policy for employees, customers and suppliers, relationship with society ...
- Other subjects: Animal testing, landmines, cluster bombs, gambling, production and sale of weapons, pornography, tobacco ...

We give a degree of importance to each indicator used to obtain a valuation of the company in each analysis area. Then we give a weight or importance to each of these areas of analysis, weighting the score for each company in that area by the weight of the area. Third, we make a second weighting is related to the impact of the sector of activity of the company in each area analyzed to assess more important the best and worst performances in each area based on the impact of activity made by the company. Finally, we obtain a final valuation of the company, allowing us to meet ESG management globally and compare it with other companies that make the investment universe.

Norms-based screening

LEI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

The criteria are set taking into account the most important points to obtain a complete view of the company in each area of analysis, are reviewed every two years, and will be communicated to shareholders through the elements of periodic communication we have with them.

Indicate which processes your organisation uses to ensure that screening in corporate fixed income is based on robust analysis.

- Comprehensive research is undertaken or sourced to determine issuers' ESG performance
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify issuers to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Information on ESG issues and/or ratings is updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct ESG research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above
