RI TRANSPARENCY REPORT

2014/15

SASRIA (SOC) Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

"Responsible Investing

The Board has applied their minds to the issue of Environmental, Social and Governance (ESG) issues, and realise the importance of targeted investments, socially responsible investing and black economic empowerment investing. As and when investments are made, the investments themselves, and the underlying managers, will also be considered from an ESG perspective.

Sasria shall therefore support the Code for Responsible Investing in South Africa (CRISA) as well as the Principals of Responsible Investing.

The Board has taken the decision that any voting rights accruing to Sasria in its capacity as a shareholder will be delegated to the asset manager in terms of the portfolio management agreement, except when otherwise instructed in writing by Sasria."

Please refer to the below extract from our 2014 integrated report

"Sasria is committed to responsible investing and is one of only five asset owner signatories to the Principles of Responsible Investing. Our investments are only outsourced to independent external investment managers who are signatories to the Principles of Responsible Investing. Sasria has an understanding of all our asset managers'

responsible investing policies and practices and it remains a standing agenda item on annual operational due diligence meetings.

Sasria is continuously improving its policies and processes pertaining to responsible investing and has requested our asset consultant to perform an ESG (Environmental, Social and Governance) benchmarking exercise to determine a baseline for measuring our performance annually. The assessment is based on the scoring methodology applied by MSCI (Intangible Value Assessment) - other scoring methodologies may produce different results - and 97% of the portfolio was covered by ESG ratings. The results of this assessment are depicted in Table 19. Sasria will measure and monitor this with the aim of improving its rating.
