# RI TRANSPARENCY REPORT

## 2014/15

Satori Capital, L.L.C.

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**OA 01.2** Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes  
 No

**OA 01.3** Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

We believe that a mindset of sustainability, or conscious capitalism, is a foundational component of a thriving business and a force-multiplier on value creation. Sustainable companies operate with a long-term perspective, have a strong sense of mission and purpose, and are willing to make short-term sacrifices for the long-term success of the company and its ecosystem of stakeholders. Companies with sustainable business practices are better managed, more innovative, less risky, and better positioned to create more enduring value over the long-term.

Additional information. [Optional]

Satori Capital is a leader in bringing sustainable business practices to the investment industry. The firm's values, vision and investment principles are ingrained in many practices that are visible to other members of the investment community, including public speaking appearances, community involvement, and ongoing productive dialogue with investors and other partners about potential ideas and alliances that promote key principles. As such, we believe it sets an example and provides a road map to other investment firms as they consider embracing ESG issues. The alternative investment industry has not traditionally emphasized ESG issues or the PRI principles because they were perceived to conflict with the financial returns necessary to satisfy limited partners. However, Satori expects its portfolio returns to outperform returns from investments in traditionally run companies and funds directly as a result of stakeholder-centric practices. By achieving long-term returns that exceed typical benchmarks while also embracing ESG issues and sustainable business practices, Satori expects to set a new standard for others in the industry to follow.
