RI TRANSPARENCY REPORT

2014/15

Sparda-Bank Muenchen eG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

--------------	------------------	--------------------	----------------

OA 06.1 List your three main responsible investment objectives you had set for the reporting year. For each, indicate any key performance indicators you set to measure your progress and also indicate your progress towards achieving your objectives.

Add responsible investment objective 1

Objective 1	Safeguarding the accessibility and useability of ressources for coming generations.
Key performance indicators	Minimizing the non-sustainable usage of ressources today. Count non-sustainable.
Describe the progress achieved	We constantly seek to avoid non-sustainable business operations wherever possible. Please find detailed information on that in our most recent "Gemeinwohlökonomiebericht".

Add responsible investment objective 2

Objective 2	Achieving a fair conciliation in society. Safeguarding the basis for life for weaker classes.
Key performance indicators	Very difficult to measure!! We measure the satisfaction of our clients every year by different means and surveys. We carefully try to draw conclusions therefrom.
Describe the progress achieved	Keeping the results at the already achieved satisfactory levels is our main goal in the moment. We try to improve that constantly.

Add responsible investment objective 3

Objective 3	To refrain from executing any non-sustainable transaction for our own accounts in financial markets.
Key performance indicators	Counting the non-sustainable transactions. We try to keep that figure at Zero.
Describe the progress achieved	No non-sustainable transactions in 2013. Having only 3 potentially non-sustainable positions / conflicts in our books from former business years.

OA 06.2	List your three main objectives for responsible investment implementation for the next reporting year and indicate any key performance indicators you intend to use to measure your progress.

SAM 12.2 Provide additional information relevant to your organisation's dialogue and monitoring of external managers. [Optional]

We have only one investment in private equity (bought many years ago), value approx. 6,9 Mio. EUR that we would like to sell mainly because of insufficient ESG reporting. There is no fair and reasonable demand for our investment.

We have stopped all our private equity activities and do not invest in that asset class any more. Insufficient ESG compliance / transparency is one of the two main reasons for that.

We consider property an asset class where ESG issues are relatively easy to implement. We have set up specific policies that are also mandatory for our management agreements.

We do not have any infrastructure non-listed assets.

ESG incorporation in actively managed fixed income

FI 03	Voluntary	Descriptive	PRI 1
-------	-----------	-------------	-------

	Fixed Income - Government
--	---------------------------

We have a very strict ESG related investment policy of exclusion of non-ESG-compliant asset classes or assets that is of course also applied to our fixed income assets.

When a company is excluded because of insufficient ESG compliance we neither buy stocks nor buy fixed income securities, nor buy any other capital markets products from it. We check ESG issues not only on the level of a single investment, but on the level of the whole asset class. When an asset class is prone to be non-ESG-compliant we exclude the whole asset class. That is also the reason, why we do not pursue the best-in-class approach.

It could happen that we buy securities from a very ESG compliant company that is in a non-ESG-compliant asset class as an exception. However: This has never happened since we are UNPRI signatories and is very unlikely to happen in the near future.
