

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Description

Our analysts who have ultimate responsibility for ESG analysis as part of their bottom up analysis scour their respective industry universes to identify issuer- and security-level sources of potential alpha while taking a prudent level of risk. In analyzing a specific issuer and its fixed income securities, we carefully assess the fundamental characteristics of each issuer and the long-term sustainability of the issuer by incorporating ESG factors into the analysis. We thoroughly analyze key variables as they relate to Standish and conduct a comprehensive historical analysis of operations and financials, including applying financial and scenario analysis of individual issuers.

In terms of countries, we analyze fiscal responsibility, important growth and inflation ratios, and use an internal rating process. To assess the future direction of credit quality, we build our own pro-forma financials based to assign proprietary ratings. In addition to analyzing solvency, liquidity, and macroeconomic factors our sovereign research considers the following social and governance indicators when assigning our proprietary rating:

Voice and accountability
Political Stability
Regime Stability
Regulatory Quality
Rule of Law
Control of Corruption

Corporate and sovereign analysts conduct extensive one-on-one meetings with key senior management and officials. These meetings with management and government officials focus not only on financial metrics but their respective business models, governance and structural policies. During the discussion we try to gauge the credibility and sustainability of their long term plans and incorporate weaknesses or lack of credibility into our risk assessments and forecasts.

- Positive/best-in-class screening
- Norms-based screening

FI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Exclusionary screening is done only at the direct request of individual clients in their personal portfolios. Screening criteria are changed at client direction.
