RI TRANSPARENCY REPORT

2014/15

SUSI Partners AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

The future energy supply is based on the three cornerstones:

(1) generation of renewable energy

(2) improvement of energy efficiency

(3) energy storage and smart grids

SUSI Partners AG is specialized in identifying and analyzing sustainable energy infrastructure projects. Through its subsidiary Sustainable Sàrl (LUX) measures for the implementation of the energy transition can be financed to generate stable annual returns for institutional investors. The Funds advised by SUSI Partners AG finance exclusively measurable sustainable and ecologically responsible infrastructure like renewable energy projects and energy efficient retrofits of existing infrastructure (e.g. public infrastructure, industrial facilities, private buildings). We measure the amount of CO2 savings per project (in t CO2/yr).

SUSI Partners AG is an investment advisor identifying and analyzing sustainable energy infrastructure projects to implement the energy transition. These projects are then financed through the funds managed by SUSI Partners AG's subsidiary Sustainable Sàrl (based in Luxembourg). The funds advised by SUSI Partners AG generate stable returns for institutional investors and invest exclusively in measurable sustainable and ecologically responsible infrastructure like renewable energy projects and energy efficient retrofits of buildings and industrial facilities.
