RI TRANSPARENCY REPORT

2014/15

Symbiotics SA

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Corporate Identity

Science refers to "symbiotics" as the study of different species of organisms that are interdependent, gaining benefits from their mutual relationships; life sciences refers to "symbiotics" as the study of human evolution based on social networking and bonding rather than natural selection; social sciences refers to "symbiotics" as the art of associating men for the purpose of establishing, cultivating and conserving social life among them.

Vision

Symbiotics believes in value creation through mutually beneficial human relationships. Our vision is to contribute to positive human development that grows out of social and economic connections and synergies, in particular by investing in grassroots entrepreneurial activities in underserved economies.

Mission

Our mission is to contribute to the democratization of access to capital and to an economic development which is more inclusive, socially responsible and sustainable. The company reaches this goal by helping investors reach out to micro-, small and medium enterprises markets in low income economies, through innovative investment services.

Values

Our corporate values are focused on the principles of independence, integrity and innovation; independence towards our clients and partners, integrity of our staff and work and innovation of our products and services.

IFD 02.1	Provide a brief description of the governance and management structures and processes you have in place for your responsible investment activities and implementation of the PIIF.
----------	--

Symbiotics SA, the mother entity, is owned by over 39 shareholders, mostly private individuals, all motivated by the mission and vision of the company. This relatively wide equity base is consistent with the founders' objective of avoiding concentration in the shareholding structure. It ensures independence of the company, diffusing responsibilities, strengthening the governance structure of the firm as it grows and institutionalizes. Most importantly, it creates positive synergies between a motivated group of diverse investors and professionals around a common mission. The company also follows strict good corporate governance principles, including the separation of roles between the board and management, and offers all staff the possibility to participate in the equity.

The mission of Sustainable Finance Geneva is to promote sustainability and responsibility within the Geneva financial community. We are targeting professionals who have an interest in responsible investment and want to better structure and focus their action.

Swiss Sustainable Finance ("SSF") was created to promote sustainability in the Swiss financial market, and strengthen Switzerland's position as a leading worldwide centre for sustainable finance. SSF brings together financial and non-financial service providers, investors, universities and business schools, public sector entities and other interested organisations, providing a platform to foster the integration of sustainability principles into all financial services. Through research and different work streams the Association is the first port of call for information on sustainable finance in Switzerland, as well as contributing to capacity building and working towards sound frameworks for sustainable finance.
