RI TRANSPARENCY REPORT

2014/15

TD Asset Management (TD Asset Management Inc. and TDAM USA Inc.)

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

TDAM has a range of potential conflicts of interest, including ones from being a member of the TD Bank Group. TDAM has policies and procedures in place to ensure that, in all cases, it adheres to its fiduciary duty to act in the best interest of each client account. For example, its personal trading policy, which is in addition to its Code of Conduct and Ethics Policy, requires that employees receive approval for trades and make an annual declaration that they have adhered to the policy. Failure to comply may result in disciplinary action up to and including termination of employment. TDAM's potential conflicts are extensively disclosed in the relevant client disclosure documents; the Statement of Policies and Client Relationship Disclosure for TD Asset Management Inc. and the ADV Part II for TDAM USA Inc.

OA 18.2

Describe any specific features of your approach to responsible investment that you believe are particularly innovative.

TDAM has collaborated extensively with Canadian securities regulators on environmental and social disclosure for many years.

In the summer of 2010, TDAM and the Canada Pension Plan Investment Board were the only two institutional investors who were on the expert panel that helped the Ontario Securities Commission write Canada's national regulatory notice on environmental disclosure;

In the fall of 2010, we trained more than 150 staff of Canada's various securities commissions on environmental and social disclosure issues;

In 2011, TDAM helped the Toronto Stock Exchange design and run E&S disclosure workshops for 75 representatives of listed companies across a wide range of industries.

The latest version of our policy explicitly supports efforts by securities regulators to be more active in ESG enforcement.

Overview

LEI 02	Voluntary	Descriptive	PRI 1
--------	-----------	-------------	-------

LEI 02.1 Provide a brief overview of how you incorporate ESG issues into listed equity investments.

We focus on the Canadian companies where we believe we have the best access to information and the best ability to influence management teams to improve outcomes on ESG-related issues.

Our incorporation of ESG includes the following:

1. Highlighting areas where the company does well and areas needing improvement in company / sector research reports;
2. Maintaining a proprietary ESG matrix with information obtained from third party research providers;
3. Thematic ESG research is maintained on a shared drive accessible by the TDAM team;
4. Canadian sector analysts ask relevant ESG-related questions when meeting with management teams, or via email / phone if needed. Formal letters are sent to companies requesting information on particular issues.

LEI 03.2 Describe your primary reasons for choosing a particular ESG incorporation strategy.

Our fund mandates do not include incorporating sustainability themed investing, but rather focus on maximizing risk-adjusted return.

Integration allows us to consider a company's attractiveness as an investment, by adding ESG considerations to other measures. It also leads to more informed discussions with management teams.

LEI 03.3 Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

We incorporate all three strategies for the TD Private North American SRI Model Portfolio.

LEI 04.2 Provide a brief description of the ESG information used, highlighting any differences of sources of information across your ESG incorporation strategies.

We use information received from companies, as well as from sell-side, ESG research providers, to determine exposure to various ESG-related risks.

We also monitor sectors with higher exposure. For example, environmental risk is a focus for the energy, materials and utility sectors, and social risk for the consumer discretionary, consumer staples, energy, materials and industrials sectors.

We evaluate country risk for companies with operations in relatively high-risk jurisdictions on a variety of factors, including the conduct of the country's government, corruption levels, environmental and employee safety standards.

LEI 04.3 Indicate if you incentivise brokers to provide ESG research.

- Yes

LEI 04.4 Describe how you incentivise brokers.

TDAM's regulatory risk group coordinates our semi-annual broker voting process whereby portfolio managers and analysts would vote for those broker/dealers whom they believe provide valuable research products and services, including ESG research. The outcome of the process is used to better incentivising brokers through commissions allocation.

(C) Implementation: Integration of ESG issues

LEI 10	Voluntary	Descriptive	PRI 1
---------------	------------------	--------------------	--------------

LEI 10.1	Describe how you integrate ESG factors into investment decision making processes.
-----------------	---

We first analyse potential investments based on company's financial prospects and investment return expectations, then incorporate ESG-related risks into our company / sector specific risk analysis.

In some cases, ESG risks could be quantifiable, such as additional expenses to meet environmental compliance or industry best practise standard; while in other cases, ESG risks are hard to quantify, such as reputational or other risks. This essentially leads to a question on the company's ability to sustain its operational performance, margins, and business.

Similarly, a company may have business opportunities based on ESG factors that give it a competitive advantage. This would be folded into the opportunity profile and incorporated into our investment decision-making process.

Additionally, through the integrating process, we form a better idea on the company's ESG policy, allowing us to have a more informed discussion with the management team and form a better assessment of the quality of the management team.

(Proxy) voting and shareholder resolutions

Overview

LEA 16	Voluntary	Descriptive	PRI 2
---------------	------------------	--------------------	--------------

LEA 16.1 Provide a brief overview of your organisation’s approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).

Consistent with our legal duty of undivided loyalty to our clients, and the financial nature of our role, we vote all proxies based on the best financial interest of the specific account.

Votes at Canadian portfolio companies are analyzed and voted by our internal proxy analyst, who is based in our arm's-length legal department and is independent of both TDAM and our parent bank (a public company). We use an internal analyst partly because of the conflicts of interest that proxy advisory firms periodically have. If our internal analyst becomes aware of a conflict involving another part of TD, the matter is referred to an independent TDAM proxy committee staffed with individuals unaware of the conflict, to ensure that all votes are cast in the best interest of the account. If the committee cannot render an independent decision, we vote based on the recommendation of an independent proxy advisory firm. We do not vote at meetings of our parent bank, not even based on the analysis of an independent proxy advisory firm.

Most items at non-Canadian companies are voted on our behalf by an independent proxy advisory firm based on standing instructions from us, supplemented by their analysis. Some items are referred to us for a decision, including proxy contests, change-of-control transactions and some of our environmental and social votes.

Between the votes we cast internally and the votes cast on our behalf, we cast approximately 30,000 votes by proxy each year at companies around the world.

Additional information. [Optional]

We disclose our votes for all investment funds that are reporting issuers under Ontario securities law. The holdings of the funds that are not reporting issuers are already covered in the reporting issuer funds. We published proxy voting reports for 152 funds in 2014, disclosing how the funds voted at thousands of companies around the world.

ESG incorporation in actively managed fixed income

FI 03	Voluntary	Descriptive	PRI 1
-------	-----------	-------------	-------

FI 03.1 Provide a brief overview of how you incorporate ESG issues in fixed income investments.

Fixed Income - Corporate

For our investment-grade corporate Fixed Income investments (including Money Market), we integrate ESG factors into our credit analysis where consistent with the mandate and otherwise permitted. The process, including assessment of ESG issues, is carried out by the corporate credit analysis team within the TDAM research team.

Implementation processes

FI 04	Mandatory	Gateway/Core Assessed	PRI 1
-------	-----------	-----------------------	-------

FI 04.1 Indicate (1) which ESG incorporation strategy and/or combination of strategies you apply to your actively managed corporate fixed income investments; and, (2) the breakdown of your actively managed corporate fixed income investments by incorporation strategy or combination of strategies.

ESG incorporation strategy (select all that apply)

- Screening alone (i.e. not combined with any other strategies)
- Thematic alone (i.e. not combined with any other strategies)
- Integration alone (i.e. not combined with any other strategies)

Percentage of active corporate fixed income to which the strategy is applied (estimate +/- 10%)	
	100

- Screening + Integration strategies
- Thematic + integration strategies
- Screening + thematic strategies
- All three strategies combined
- No incorporation strategies applied

FI 04.2	Describe your primary reasons for choosing a particular incorporation strategy.
----------------	---

We use a systematic and repeatable process for evaluating fixed income issuers. Where ESG issues present material credit risks, we incorporate them into our systematic review of an issuer. We integrate rather than screen for the reason discussed earlier under listed equities.

FI 05	Voluntary	Additional Assessed	PRI 1
--------------	-----------	---------------------	-------

FI 05.1	Indicate what ESG information you use in your ESG incorporation strategies and who provides this information.
----------------	---

Type of ESG information

- Raw ESG company data

	Describe who provides this information.
--	---

Company provided information

- Issuer-related analysis or ratings
- Sector-related analysis or ratings
- Country-related analysis or ratings
- Screened bond list
- ESG issue-specific analysis or ratings
- Other, specify

FI 05.2	Provide a brief description of the ESG information used, highlighting any differences of sources of information across your ESG incorporation strategies.
----------------	---

An example: For heavy carbon emitting industries such as utilities and automotive manufacturing, we consider the cost of meeting regulatory CO2 requirements and its potential impact on credit-worthiness.

(C) Implementation: Integration of ESG factors

FI 10	Voluntary	Descriptive	PRI 1
--------------	-----------	-------------	-------

FI 10.1	Describe how you integrate ESG issues into investment decision-making processes.
----------------	--

ESG issues are incorporated into our process of assessing risk. We do not do a separate analysis of ESG issues, but we focus on ESG issues which are relevant to the issuer's credit-worthiness.

FI 19.2

Describe your organisation's approach to engagement in corporate fixed income.

We regularly meet with officials from companies and the governments that we invest in, or consider for investment, to discuss all issues (including ESG) which are likely to have an impact on our internal credit ratings. Engagement is carried out by the individual credit analysts responsible for the particular sector. Meetings typically take place face to face, and occasionally by phone.
