RI TRANSPARENCY REPORT

2014/15

TriLinc Global, LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Responsible Investment Policy: We seek to demonstrate the power of private capital in helping to solve some of the world's pressing socioeconomic and environmental challenges. We are committed to creating and managing institutional-class impact funds that attract private capital at scale, and to investing, monitoring and reporting financial and impact performance. Our goal is to advance systemic change by investing with the intention to drive economic growth, social advancement and environmental sustainability, while seeking market-rate returns.

With oversight from its Sustainability and Impact Committee, TriLinc Global incorporates the following impact procedures into its investment process:

- *Outcomes and Metrics Identification* - Identification of desired outcomes and appropriate corresponding metrics for meaningful measurement of economic development, social advancement and environmental protection
- *Portfolio Management Platform Integration* - Incorporation of impact metrics into portfolio management platform to analyze progress toward impact objectives alongside financial performance
- *External Reports Creation* - External reporting of impact results at the portfolio-level, as well as for each investment

The Firm utilizes the Impact Reporting and Investment Standards (IRIS) metrics taxonomy for measuring the economic, social and environmental impact of individual investments. IRIS is the catalogue of generally-accepted performance metrics that leading impact investors use to measure social, environmental and financial success. By providing a standard language to describe social and environmental performance, IRIS makes it easier to compare investments and ensure consistent measurement across various investment opportunities.

Innovation

OA 18	Voluntary	Descriptive	General
-------	-----------	-------------	---------

OA 18.1 Indicate whether any specific features of your approach to responsible investment are particularly innovative.

- Yes

OA 18.2 Describe any specific features of your approach to responsible investment that you believe are particularly innovative.

We have developed a systematic approach to impact investment packaging, registration, management and distribution, in order to harness the power of private sector capital for good. Backed by extensive market research, legal counsel and infrastructure investment, we design institutional-class impact funds that can attract capital at scale through these characteristics:

- Themes with general market appeal and familiar product structures
- Measurable, reportable Impact opportunities beyond ESG
- Competitive, yield-oriented financial returns
- Sub-advised by institutional-quality local managers
- Capacity to scale to \$1.5-2.0 billion

The key financial innovation that our firm has brought to both the asset management and impact industries is a \$1.5 billion target, U.S. first-mover publicly registered, market rate, retail impact fund. We use the traditional financial product distribution channels of broker-dealers, registered investment advisory firms and banks in order to educate and engage with 100,000 financial advisors at 200 firms across the U.S. regarding impact investments for their clients. By creating three share classes in our fund, we can accommodate institutional, high net worth and retail investors. To date, U.S. retail investors, who control US\$17 trillion in assets, have lacked mainstream, market-rate impact offerings. Retail investors have greater opportunity to align their values with their money, and their participation in impact investing will exponentially increase the flow of capital to responsible investments.
