RI TRANSPARENCY REPORT

2014/15

Transnet Retirement Fund

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OA 01.1 Indicate if you have a responsible investment policy.

- Yes
 No

OA 01.2 Indicate if you have other guidance documents or more specific policies related to responsible investment.

- Yes
 No

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

The Investment Committee recognises that a key risk to long term investing is the under-estimation of factors that ultimately adversely affect the intrinsic value of a company (e.g. a change in environmental legislation or even just the stricter application of existing laws). Consistent with this, the Investment Committee will challenge its active managers on the economic sustainability of their investment decisions and the extent to which they have allowed for low probability but high adverse impact events in the assessment of intrinsic value.

The Fund will not classify investments as SRI, but rather relate the investment to its underlying nature. For example, if the investment is in infrastructure, it will be called "Infrastructure" - in this way it is clear to members what the nature of the investment is.

The Fund will incorporate ESG issues into its investment analysis and decision-making processes. It follows that the Fund will aim to be an "active owner" of its assets and incorporate ESG issues into its ownership policies and practices. The Fund will also seek appropriate disclosures on ESG issues by the asset managers relating to the entities into which it is invested.
