RI TRANSPARENCY REPORT

2014/15

Union Investment

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

As a German asset manager, we are trustees for client assets. We see the legal and regulatory constraints as well as codices for investment funds (e.g. BVI Rules of Conduct, BVI Guidelines for Responsible Investment, Corporate Governance Codex) as an expression of our responsibilities and implement them actively for the benefit of our investors. Union Investment is part of the cooperative financial group and, as such, we always feel strongly linked to the cooperative values and principles of responsibility in the community. Our corporate culture is characterised by partnership, professionalism and simplicity and reflects our approach of responsibility in a cooperative sense.

Moreover, as part of our fiduciary duties, we exercise voting authority over client shares and vote them in the best interests of clients. To fulfil our duties, we have adopted policies and procedures for the voting of shares and disclose those policies and procedures to clients on a regular basis.

Describe your policy on managing potential conflicts of interest in the investment process. [Optional]

To avoid potential conflicts of interest to the detriment of our customers, Union Investment has taken various organisational measures. For the investment advisory and portfolio management, these are, in particular:

- Principles for fair advice of the investor and adherence to the agreed investment guidelines
- Placement of orders in accordance with best execution principles
- Principles for the execution of client orders and pooling of orders
- Establishment of areas of confidentiality for individual investment professionals to prevent the misuse of confidential information from the services or the improper influence on these services by these investment professionals
- Code of conduct for private transactions by employees to exclude any discrimination of customer transactions against employee transactions
- Rules on Corporate Governance for Management and Supervisory Board
- Careful selection, training and qualification of our employees
- Conflicts of interest that cannot be avoided despite the measures are disclosed prior to the service

Complying with all the above mentioned obligations is constantly monitored by the independent compliance office in our firm and regularly reviewed by the internal and external auditors.

Governance and human resources

OA 07	Voluntary	Descriptive	General
--------------	------------------	--------------------	----------------

Union Investment Group is organised in a holding structure. While the holding company is responsible for the strategic development of the group, as well as central tasks such as Human Resources, Accounting, Compliance etc., daily business operations take place according to our segmental structure. Each segment is headed by a segment head, who is responsible for the further specification and realisation of the strategy defined by the executive board.

The sustainability management of Union Investment is based on a broad foundation and is headed by an experienced manager who has known the company for twenty years. He is responsible for merging all the individual activities which occupy an increasingly larger space on product and company levels.

In order to establish the corporate social responsibility at the company level, we have defined a sustainability strategy and introduced a sustainability management system.

Sustainability or Corporate Social Responsibility (CSR) provides the framework for responsible business conduct, which goes beyond the legal requirements. We continually seek dialogue with our stakeholders on sustainability issues. At Union Investment, CSR is organisationally based on four fields of action: people, products, environment and society. Thereby, the field of action organisation and communication serves as a common interface.

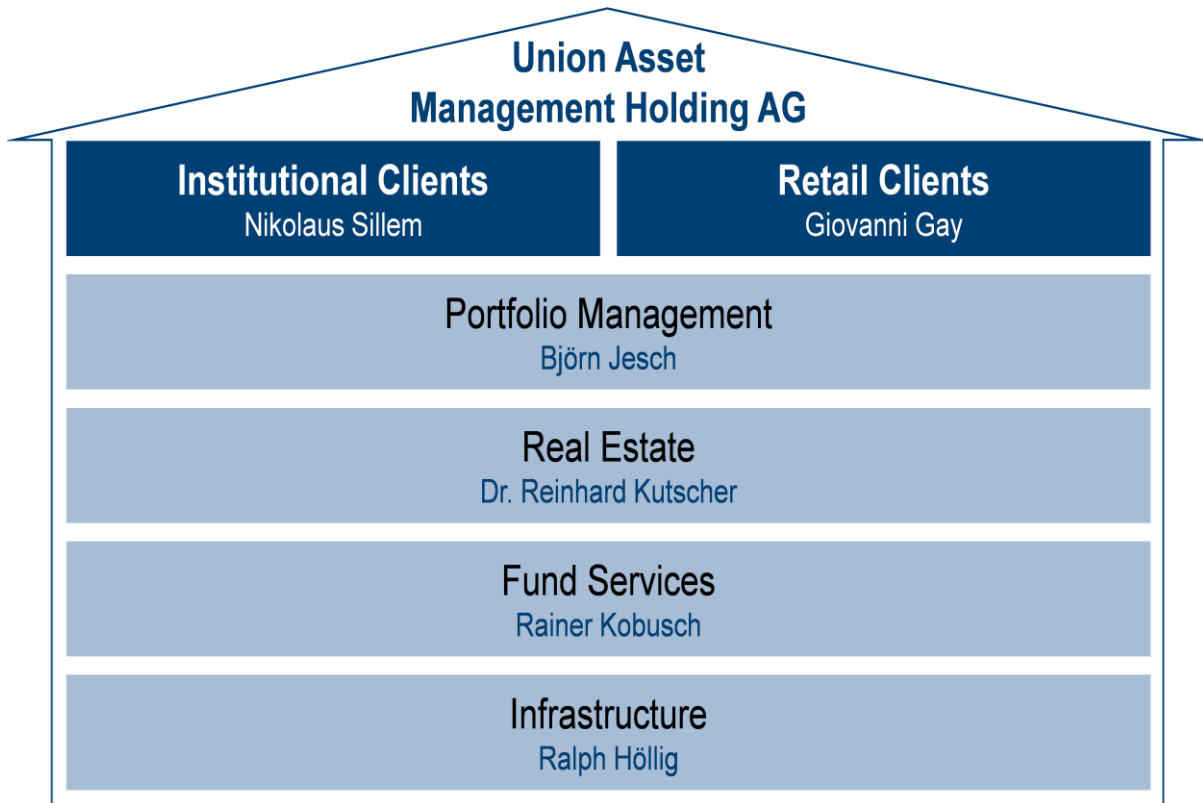

On the product level, our commitment to sustainability is firmly implemented within our investment processes. For this purpose, in 2010, we adopted a sustainability strategy that sets out the framework for conducting our business in a responsible manner. Moreover, our responsible investment (RI) policy specifically sets out the responsible practices we apply in our investment processes. In this context, we have a dedicated Sustainability Research (SR) team of experts, who undertake focused research on environmental, social and governance issues. To this end, the SR team works with specialised external research providers.

Additionally, the SR team benefits from the global expertise of the broader Union Investment fundamental research platform consisting of 17 sector analysts, each of whom have in-depth knowledge and understanding of sectors and companies that their research covers.

Moreover, assets under management in our real estate segment total approximately EUR 25 billion, which makes Union Investment a leading European real estate asset manager. Over 500,000 investors put their trust in the investment expertise and long experience of Union Investment's property fund specialists.

Long-term thinking is fundamental to our real estate investment activity. It is, therefore, no coincidence that our funds increasingly include properties that meet the requirements not only of economic viability but also of ecological and sociocultural sustainability. In-depth expertise and international knowledge transfer form the basis of our decision-making. This applies in particular to the field of sustainability, which presents the real estate sector with many challenges. We are learning more every day, finding answers to a host of questions through our involvement with bodies such as the Urban Land Institute, the German Property Federation (Zentraler Immobilien Ausschuss, ZIA) and the German Sustainable Building Council (DGNB).

Additional information. [Optional]

We are delighted to report that our award-winning SRI approach has been recognised externally and acknowledged with various awards. Furthermore, our team members have contributed in terms of keynote presentations, academic articles and other publications.

Our achievements in sustainable investing were recognised in November 2014 when we were recognised as the "Best Asset Manager 2015" in the Socially Responsible Investing (SRI) category for Germany, Austria and Switzerland in the FERI EuroRating Management Awards, an award we received for the second time after 2013.

More specifically within our SRI Team, Florian Sommer is currently a member of the PRI Steering Group Fixed Income and the Former Chair of PRI Working Group Sovereign Bonds (duration 18 months). He has published papers on corruption and sovereign bonds risks, was a sponsor of the PRI Guide Fixed Income and a speaker at our annual sustainability conference. Furthermore, in June 2014, Florian co-authored an impressive report with another colleague at Union Investment on the topic of corruption entitled "Corruption and the risks of losses on government bonds" (click on link). He is regularly quoted in newspapers regarding ESG issues.

Ingo Speich is a member of the "Schmalenbach Gesellschaft" Working Group - Reporting Corporate Governance and attends various annual corporate governance conferences within the industry and also conferences offered by Union Investment. Some of his recent publications include "CSR und Finance - Intangibles: "Forderung institutioneller Investoren nach aussagekräftiger extrafinanzieller Berichterstattung" (click on link) (Springer Verlag, 2014) and "Nachhaltige Geldanlagen" (Frankfurt School, 2014). He is regularly quoted in newspapers regarding governance and sustainability matters.

LEI 02.1 Provide a brief overview of how you incorporate ESG issues into listed equity investments.

As an active manager, we take ESG issues into account in the context of fundamental analysis as we believe ESG provides an enhanced insight. In particular, ESG issues can provide an additional insight on risks, such as event risks, regulatory risks, litigation risks and reputation risks.

In addition, we employ for our dedicated SRI assets a combination of SRI approaches covering exclusion screening, best in class, and sustainable thematic strategies.

LEI 03.2 Describe your primary reasons for choosing a particular ESG incorporation strategy.

As an active manager, we take ESG issues into account in the context of fundamental analysis, as we believe ESG provides an additional insight. In particular, ESG issues can provide an enhanced insight on risks, such as event risks, regulatory risks, litigation risks and reputation risks. Therefore, ESG integration helps us to make better informed investment decisions.

LEI 03.3 Where assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

As an active asset manager, we implement the findings of our ESG analysis in our investment decisions. In extreme cases, this can result in issuers being excluded from the investment universe. For instance, we no longer invest in stocks that do not comply with the Oslo Convention on cluster munitions or anti-personal mines.

We also manage a small number of equity funds with a dedicated thematic approach in addition to ESG integration and screening.

Engagement

Overview

LEA 01	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

LEA 01.1 Provide a brief overview of your organisation's approach to engagement.

As an active investor, we encourage companies to embrace sustainability and adopt good corporate governance. In particular, Union Investment's engagement approach is multidimensional. It focuses on constructive dialogues with companies and engagement activities at annual general meetings, including speaking and voting. These activities are supported by regular investor meetings and visits to companies ahead of their annual general meetings.

(Proxy) voting and shareholder resolutions

Overview

LEA 16	Voluntary	Descriptive	PRI 2
--------	-----------	-------------	-------

LEA 16.1	Provide a brief overview of your organisation's approach to (proxy) voting (including the filing and/or co-filing of shareholder resolutions if applicable).
----------	--

Exercising voting rights: Our portfolio managers regularly influence the management and business policy of public limited companies at annual general meetings in the interests of investors and for the benefit of the invested assets. The approach taken by Union Investment is to support all actions that will sustainably increase the value of the company in the long-term and to vote against any action that is not in line with this objective. A binding voting policy is required if we are to exercise the voting rights entrusted to us transparently and consistently. We have, therefore, defined comprehensive voting guidelines, some of which are based on the recommendations of the German Corporate Governance Code (e.g. in respect of capital measures). So that the interests and requirements of investors focused on sustainability are adequately taken into consideration, the guidelines were deliberately made stricter than the German Corporate Governance Code's recommendations. The guidelines are set out in the Union Investment Proxy Voting Policy. We use the research of our service providers but vote by our own. For that, we use our proprietary IT-based platform, PROVOX, for performing, monitoring and recording votes.

ESG incorporation in actively managed fixed income

FI 03	Voluntary	Descriptive	PRI 1
-------	-----------	-------------	-------

FI 03.1 Provide a brief overview of how you incorporate ESG issues in fixed income investments.

Fixed Income - Corporate

As an active manager, we take ESG issues into account in the context of fundamental analysis as we believe ESG provides an enhanced insight. In particular, ESG issues can provide an enhanced insight on risks, such as event risks, regulatory risks, litigation risks and reputation risks.

In addition, we employ for our dedicated SRI assets a combination of approaches: exclusion screening, best in class and sustainable thematic strategies.

Implementation processes

FI 04	Mandatory	Gateway/Core Assessed	PRI 1
-------	-----------	-----------------------	-------

FI 04.1

Indicate (1) which ESG incorporation strategy and/or combination of strategies you apply to your actively managed corporate fixed income investments; and, (2) the breakdown of your actively managed corporate fixed income investments by incorporation strategy or combination of strategies.

ESG incorporation strategy (select all that apply)

FI 04.2

Describe your primary reasons for choosing a particular incorporation strategy.

As an active manager, we take ESG issues into account in the context of fundamental analysis, as we believe ESG provides an enhanced insight. In particular, ESG issues can provide an enhanced insight on risks, such as event risks, regulatory risks, litigation risks and reputation risks. In extreme cases, this can result in issuers being excluded from the investment universe. For instance, we no longer invest in stocks that do not comply with the Oslo Convention on cluster munitions or anti-personal mines.

(A) Implementation: Screening

FI 06

Mandatory

Descriptive

PRI 1

FI 06.1

Indicate and describe the type of screening you apply to your internally managed active corporate fixed income investments.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

ESG screening is primarily being used to provide an enhanced understanding of risks. In extreme cases, this can result in issuers being excluded from the investment universe. For instance, we no longer invest in securities that are involved in producing cluster bombs or anti-personell landmines.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Positive/best-in-class screening is being applied to our SRI assets.

- Norms-based screening

Screened by

- UN Global Compact Principles
- Universal Declaration of Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Description

Positive/best-in-class screening is being applied to our dedicated SRI assets.

FI 06.2

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

Screening criteria are defined by Union Investment's SRI Team using its Sustainable Investment Research Information System (SIRIS). For our institutional SRI assets, screening criteria are being established together with the clients according to their ESG preferences and values.

FI 07**Mandatory****Core Assessed****PRI 1****FI 07.1**

Indicate which processes your organisation uses to ensure that screening in corporate fixed income is based on robust analysis.

- Comprehensive research is undertaken or sourced to determine issuers' ESG performance
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify issuers to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Information on ESG issues and/or ratings is updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct ESG research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

FI 07.2

Additional information. [Optional]

We have a dedicated and proprietary ESG Research platform called SIRIS (Sustainable Investment Research Information System), where all ESG data/research is being analysed and stored.

SIRIS stands for Sustainable Investment Research Information System and is Union Investment's proprietary ESG Research platform. SIRIS draws on data from more than 3 different rating agencies, public sources, and proprietary research from Union Investment analysts / portfolio managers. SIRIS integrates ESG in portfolio management by making ESG measurable and manageable across portfolios and its benchmarks for different asset classes.

FI 08**Voluntary****Additional Assessed****PRI 1****FI 08.1**

Indicate which processes your organisation uses to ensure that fund criteria are not breached in corporate fixed income investments.

- Checks are performed to ensure that issuers meet the funds' screening criteria. These checks are:
 - Systematic
 - Occasional
- Automated IT systems prevent investment managers from investing in excluded bonds or those that do not meet positive screening criteria
- Audits of fund holdings are undertaken regularly by internal audit function
- Other, specify
- None of the above

FI 08.3	Additional information.
---------	-------------------------

Our compliance system (pre and post trade) prevents that securities enter or stay in portfolios that are on a specified exclusion list. If there is a breach, relevant securities have to be sold within a grace period.

(C) Implementation: Integration of ESG factors

FI 10	Voluntary	Descriptive	PRI 1
-------	-----------	-------------	-------

FI 10.1	Describe how you integrate ESG issues into investment decision-making processes.
---------	--

As an active manager, we take ESG issues into account in the context of fundamental analysis, as we believe ESG provides an additional insight. In particular, ESG issues can provide an enhanced insight on risks, such as event risks, regulatory risks, litigation risks and reputation risks. Therefore, ESG integration helps us to make better informed investment decisions.

Union Investment conducts internal "sustainability investment checks" (SI-Check) for all objects annually. The sustainable investment check is a questionnaire on the "sustainability quality" of a building in the categories: energy, resources, economy, user comfort, location and operation. For existing building, the SI-check is used a tool to identify building potentials.

Furthermore, Union Investment introduced the "Portfolio Sustainability Management" system where consumption data (energy consumption, carbon emissions, water consumption, waste generation) qualitative data (SI-Check) and further sustainability specific data (energy pass, certifications) is monitored.
