# RI TRANSPARENCY REPORT

## 2014/15

Ubique Asset Management Pty Ltd

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

- No incorporation strategies applied

Total actively managed listed equities

100%

LEI 03.2

Describe your primary reasons for choosing a particular ESG incorporation strategy.

Whilst Ubique does not offer specialist ethical or sustainable investing portfolios, we believe:

1. That we have a duty to act in the best long-term interests of our unit holders & clients;
2. That environmental, social, and corporate governance ("ESG") issues can affect the medium to long term performance of investment portfolios; and
3. If poorly managed, ESG issues have the potential to destroy shareholder value.

### (A) Implementation: Screening

LEI 06	Mandatory	Descriptive	PRI 1
--------	-----------	-------------	-------

**LEI 06.1**

Indicate and describe the type of screening you apply to your internally managed active listed equities.

**Type of screening**

- Negative/exclusionary screening

**Screened by**

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

**Description**

We screen for ESG on an individual stock level as part of our investment process. A material environmental, social or governance issue would exclude the company from our investment universe.

- Positive/best-in-class screening
- Norms-based screening

**LEI 06.2**

Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.

We use a common sense approach to ESG screening and as part of our investment process we include "no material ESG issues" as a quality filter to determine whether a company is eligible to be included in our investment universe. A material ESG issue is one which, in our opinion, substantially increases the risk of loss to our unit holders and clients. Being a mainstream manager Ubiqube will not screen out entire sectors (such as gaming), but we will assess each individual company on its merits. As the ESG screen is part of our investment process clients would be notified immediately if this was changed. This scenario however is highly unlikely.

**LEI 07****Mandatory****Core Assessed****PRI 1**

**LEI 07.1**

Indicate which processes your organisation uses to ensure that screening is based on robust analysis.

- Comprehensive ESG research is undertaken or sourced to determine companies' activities and products.
- Companies are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify companies to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Company ESG information/ratings are updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct company research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify  
  - Each Analyst is responsible for ensuring that each investment has no material ESG issues. The focus on ESG remains constant
- None of the above
