# RI TRANSPARENCY REPORT

## 2014/15

Vækstfonden

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**OA 01.3** Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

Our legal foundation stipulates that ethical and environmental aspects must be considered when making our investment decisions - both in regards to investments in funds and in start-up companies. Our investment policies and strategies reflect this. As part of our due diligence processes we aim at identifying possible ESG issues and we instruct potential investee funds/companies to give us their own account of their ESG profile both with regard to negatives and positives. Relevant ESG information is presented to our investment committee and forms an integral part of the committee's basis for decision. We strive towards improving our measures both internally and in our cooperation and dialogue with portfolio funds/companies and others regarding ESG considerations. Direct investments in start-up companies: Normally we are represented at the board of directors of our investee companies in which capacity we instruct the management to report on ESG factors and discuss such with the board whenever relevant and at least once a year. Furthermore, as a significant shareholder we require monthly reports on key developments in our portfolio companies. Fund investments: We require the new funds we invest in to act responsibly - and ask them to commit themselves contractually to this - and we follow a number of established principles for responsible investment ourselves. Our points of reference for the responsible investment policy are the UN Principles for Responsible Investments (UNPRI) and the principles outlined in the UN Global Compact initiative. Furthermore, we follow the codes and guidelines established by the European Private Equity and Venture Capital Association (EVCA). In addition - and more specifically - we do not wish to participate in transactions or financing of activities which are illegal in the country where such transactions or activities are carried out. Further, we wish to avoid participating in transactions or financing of activities which may be legal in the country where such transactions or activities are carried out but which main purposes are deemed as "unethical". We always ensure having a close dialogue with our external fund managers and ask them to report on ESG-related issues (and opportunities). We have contractual mechanisms in place calling for dialogue and engagement in regards to any ESG-issues which may arise in a fund or one of its portfolio companies and ultimately we would ask the relevant fund manager to assist us in selling our shareholding in the fund should substantial ESG-issues not be improved. We are normally represented in the investor board / advisory committee which is a relevant forum for monitoring and addressing ESG issues.
