RI TRANSPARENCY REPORT

2014/15

VBV- Vorsorgekasse AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2014-15 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

good customer relationships through quality, price-performance ratio, product safety, service orientation, fair communication, etc.

good relationships with suppliers and other business partners through fair payment, long-term partnership, etc.

good relationships with the capital investors via profitability, creditworthiness, stability, transparency,

etc.

good relationships with society overall, in the form of media, government and administrations, neighbours and the general public.

Protecting the environment

We prefer to invest in companies that have the best possible protection of the natural environment ...

anchored in their principles and strategies,
integrated in their management systems and reporting
and pursue their ongoing processes and actions in a targeted manner.

Examples of this are ...

established environmental management systems, e.g. in accordance with ISO or EMAS,
the use of renewable energies/the reduction of fossil fuels,
low/efficient use of resources, e.g. energy or raw materials,
a high proportion of reusable/recyclable materials,
low pollution of water, air and soil through emissions,
a good climate balance.

Sustainable products

We prefer to invest in companies with sustainable products and services, which ...

already take account of ecological and social consequences with their product development,
show a good ecological balance over the entire lifecycle, from production to use, right up to disposal.
show a good social balance over the entire lifecycle, from production to use, right up to disposal.
and benefit the users and society overall.

Examples of this are ...

Services from the medical and healthcare areas,
Environmental technologies and products from the area of renewable energy,
Products and services in relation to purifying and supplying water,
Services that benefit the mediation of knowledge and education.

Sustainable countries and international organisations

We prefer to invest in countries, constituent states, semi-public and supranational organisations, which ...

maintain peaceful relationships with their neighbours and are committed to keeping and promoting
peace internationally,
treat their residents fairly and grant them extensive political-democratic rights and civil liberties,
offer their residents a high degree of physical, economic and security,[DA1]
promote their residents in respect of their personal and professional development,

Norms-based screening

Screened by

- UN Global Compact Principles
- Universal Declaration of Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Description

Most of the norms-based screening is part of our criterion list anyway. Those norms help to define industry standards.

FI 06.2	Describe how the screening criteria are established, how often the criteria are reviewed and how you notify clients and/or beneficiaries when changes are made.
----------------	---

The criteria list was set up internally under supervision of our ethics committee and reviewed periodically. However there were not many changes in the past.

There is always a current version of our ESG criterions available on our website.

FI 07	Mandatory	Core Assessed	PRI 1
--------------	------------------	----------------------	--------------

FI 07.1	Indicate which processes your organisation uses to ensure that screening in corporate fixed income is based on robust analysis.
----------------	---

- Comprehensive research is undertaken or sourced to determine issuers' ESG performance
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- External research and data used to identify issuers to be excluded/included is subject to internal audit by ESG/RI staff, the internal audit function or similar
- Information on ESG issues and/or ratings is updated regularly to ensure that portfolio holdings comply with fund policies
- A committee or body with representatives independent of the individuals who conduct ESG research reviews some or all screening decisions
- A periodic review of the quality of the research undertaken or provided is carried out
- Other, specify
- None of the above

Fixed income - Government

FI 13	Mandatory	Core Assessed	PRI 1
--------------	------------------	----------------------	--------------
