RI TRANSPARENCY REPORT

2013/14

Adveq

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

----------------	---

Adveq is convinced that adherence to the principles of ESG (environmental social governance) maximizes long-term value and benefits to the firm's clients, shareholders, employees, and the communities in which it operates. It believes that adherence to such principles is particularly important for long-term oriented activity such as private equity investing.

Therefore, Adveq integrates ESG principles into its management approach, as well as into the products and services it offers to clients. ESG issues are also considered when evaluating and monitoring target fund managers, the funds they manage, and the portfolio companies in which they invest. As a signatory of the UN Principles for Responsible Investing (UNPRI), Adveq benefits from a best practice framework for evaluating and improving the firm's ESG principles and measures.

With respect to allocations of investment opportunities, Adveq has put in place investment allocation procedures (incl. an Allocation Policy) addressing potential conflict of interests. At the onset of any new fund vehicle or mandate, measures are put in place to avoid or mitigate any conflicts through simple and explicit rules. If such rules can not be used or an unexpected situation arises, the issue is escalated to the Chief Compliance Officer. In the case of funds and if no satisfactory solution can be achieved internally, Adveq may also consult the funds' Advisory Board.

General

The formal responsibility for managing ESG issues within Adveq lies with the Executive Management Committee, which is composed of the most senior members of the firm. Additionally, ESG responsibility has been assigned to the head of each investment program with final approval by Adveq's Investment Committee.

Adveq's Investment Committee ("IC") is responsible for all investment decisions at Adveq. The IC is independent of the Adveq investment program teams and performs an integral role in Adveq's efforts to achieve its clients investment return, investment risk and related services expectations. The IC members are fiduciaries of Adveq's clients with respect to all responsibilities allocated to them. In addition, the IC is responsible for ensuring that the assets of the Adveq products are maintained under effective stewardship.

Each investment recommendation brought forward by an Adveq program team and the specific investment project team must be approved unanimously by the Investment Committee. Through the pro forma plan of each client portfolio, the decision on a specific investment recommendation also takes into consideration portfolio allocation and risk issues. Adveq Risk Management attends the Investment Committee meetings and has a veto right on all decisions taken by the Investment Committee.

ESG considerations are fully integrated throughout Adveq's investment process, which is summarised below. Each potential investment opportunity is vetted through an extensive due diligence process beginning with sourcing the deal and ending with making a commitment if the opportunity passes the rigorous evaluation process. The due diligence process is divided into several stages, as described below, with the progression of each stage dependent upon a formal decision.

1. Sourcing/First Screening

Each investment opportunity is subject to a standardized screening process focusing on investment strategy, track record and team. A senior professional concludes whether such an opportunity passes to the prequalification phase, the first phase of the actual due diligence project.

2. Pre-Qualification

The prequalification is the first phase of the due diligence project and comprises a thorough analysis of the strategy, the portfolio and the investment team and a first risk-return assessment of the fund manager. If the project team and Investment Committee are in agreement to proceed, the due diligence project advances to the qualification phase.

3. Qualification

The qualification phase of the due diligence project focuses on the open issues identified throughout the project. It involves comprehensive risk-return assessments and examines all tax, legal and regulatory aspects. The qualification phase concludes with a formal presentation and recommendation to the Investment Committee which ultimately decides whether or not to invest.

4. Subscription/Transaction

Subscription is the formal commitment to a fund and is executed once all open tax, regulatory and legal issues have been negotiated and resolved.

5. Monitoring

Adveq applies a regular in-depth monitoring process at the fund manager and investment company level throughout the life of an investee fund. Adveq actively engages with fund managers to support their development.

SAM 01	Voluntary	Descriptive	PRI 1-6
---------------	------------------	--------------------	----------------

SAM 01.1	Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.
-----------------	---

ESG is fully integrated throughout Adveq's investment process and the Firm will engage with our GPs and by extension their portfolio companies on ESG along five broad topics:

- **Fund Mandate:** Is the GP's investment policy in line with Adveq's ESG policy?
- **Policies and processes:** Does the GP have a consistent approach to integrating ESG factors into investment decision making and its own activities?
- **ESG Expertise:** Does the GP cultivate ESG expertise internally or have access to reliable ESG expertise externally?
- **Disclosure:** Does the GP seek to measure and report on ESG initiatives?
- **Portfolio Companies:** How does the GP engage its portfolio companies to manage ESG risks and opportunities?

ESG investment considerations will be captured and assessed in the due diligence process. Additionally, ESG considerations will be presented in Pre-Qualification and Investment Recommendation documents prepared by the investments teams.

Post investment, Adveq seeks to monitor private equity funds and their portfolio companies in a structured manner using software provided by ESG Analytics, one of the first firms to solely focus on measuring ESG in private equity. We are rolling out this software in a structured manner across all Adveq's investment programs.

Additional information. [Optional]

ESG issues and topics are important to Adveq and we welcome engaging with our investors on these issues. To this extent, we dedicate time at our Annual General Meeting to update investors on how we are progressing with ESG related issues. In addition, we will also discuss ESG issues with our investors at their regular update meetings.
