RI TRANSPARENCY REPORT

2013/14

Afena Capital (Pty) Limited

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

At present, a Proxy Voting and Engagement Activity Report is compiled for distribution to clients as part of the quarterly reporting process. We regard the investments that we hold on behalf of our clients as representing part ownership of the underlying businesses. We also view seriously our responsibility to exercise voting authority over the securities which form part of our clients' portfolios.

In the report, we summarise Afena Capital's active ownership activities over the most recent quarter by listing our proxy voting and engagement activity.

We are also in the process of developing a more comprehensive report that will provide our clients with deeper insight into our responsible investing strategy, by incorporating ESG considerations through our investment analysts' bottom up fundamental share analyses, as part of the investment decision making process.

OA 01.3 Provide a brief description of the key elements of your responsible investment policy or, if you do not have a policy, of your overall approach to responsible investment. [Optional]

At Afena Capital, we have adopted two approaches as the pillars of our Responsible Investing strategy:

1. Integration of ESG factors into our investment process with a view to ensuring that our analysts are cognisant of the impact that ESG factors have on the sustainability and, ultimately, the valuation of the companies that they form opinions on.
2. Being active share owners by undertaking proxy voting and, where appropriate, engagement with the management of investee/potential investee companies.

We believe that following the above Responsible Investing strategy enhances the depth and breadth of our investment research process and helps us to consider a wider range of risks and opportunities within the universe of companies we invest in on behalf of our clients.

Whilst the first pillar has not been reduced to a policy document, as such, it is implicit in our investment process. With respect to proxy voting, Afena Capital has Proxy Voting Policy that has been adopted by the Investment Committee.

We don't currently believe that *dedicated* (interpreted as meaning "in addition to the regular investment analysts") responsible investment staff are necessary.
