RI TRANSPARENCY REPORT

2013/14

ASB Community Trust

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2013-14 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted. This results in some Principles not being explicitly highlighted. For instance, Principle 1 and 2 cannot be implemented without implementing Principle 3, but there are cases when Principle 3 is not explicitly highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

----------------	---

11. Responsible Investment Policy (taken from the ASB Community Trusts Statement of Investment Policies and Objectives (SIPO)). In its fiduciary role the Trust believes that environmental, social and corporate governance (ESG) issues can affect the performance of investment portfolios and in support of these beliefs the Trust is a signatory to the United Nations Principles for Responsible Investment (UNPRI). The UNPRI embodies an internationally accepted framework for investors to manage ESG issues in a manner consistent with improving long-term investment returns. By becoming a signatory The ASB Community Trust will, over time apply the following Principles: 1. incorporate ESG issues into investment analysis and decision-making processes. 2. be active owners and incorporate ESG issues into its ownership policies and practices. 3. seek appropriate disclosure on ESG issues by the entities in which it is invested. 4. promote acceptance and implementation of the Principles within the investment industry. 5. work together with other signatories to enhance its effectiveness in implementing the Principles. 6. report on its activities and progress towards implementing the Principles. Investment managers are selected by the Trust with consideration given to their beliefs and practices relating to ESG issues. The Trust may hold investments through pooled funds as an effective and cost efficient means of accessing some global markets. For such funds the Trust recognises that it will have no influence over the structure of the product or securities held in the fund. All investment managers must actively vote using guidelines developed around best practice fiduciary standards and may use the expertise of specialist providers of research and proxy voting services. The Trust's benchmark for responsible corporate behaviour is the United Nations Global Compact. The Trust encourages dialogue and discussion on any issues raised through a process of engagement. Where appropriate the Trust may participate in collaborative engagement with other institutional investors via the UNPRI. The Trust stays abreast of developing practices in responsible investment, monitors relevant literature and research and is a member of the Responsible Investment Association of Australasia. The Trust is a signatory to the Carbon Disclosure Project. 11.1 Mission Related Investing Mission related investing (MRI) is the term used to describe investments made by philanthropic entities in the pursuit of both financial and social returns. MRI involves proactively seeking investment opportunities that produce a blend of financial returns and social impact that are in line with the Trust's mission. The Trust will consider investigating further any compelling investment opportunities that are aligned to the Trusts mission. 11.2 Social Lending While the Trust currently does not provide lending facilities, Trustees may be presented with lending opportunities for consideration in the future.
